Tourism Development A.K. Bhatia, 2002-01-01 Tourism development tourism economics sociology psychology environment geography **Tourism and Sustainable Community Development** Derek Hall, Greg Richards, 2002-09-11 As the tourist industry becomes increasingly important to communities around the world the need to develop tourism in a sustainable manner has also become a primary concern. This impressive collection of international case studies addresses this crucial issue by asking what local communities can contribute to sustainable tourism and what sustainability can offer these local communities in return. The role of the community in environmental, cultural and economic sustainability is highlighted in an extraordinary variety of contexts ranging from inner city Edinburgh to rural northern Portugal and the beaches of Indonesia. Individually the investigations in this text present a wealth of original research and source material while collectively they illuminate and clarify the term community the meaning of which it is argued is vital to understanding how sustainable tourism development can be implemented in practice **Tourism Development and the Environment:**

Beyond Sustainability? Richard Sharpley, 2009-09-02 Tourism Development and the Environment Beyond Sustainability challenges the sustainable tourism development paradigm that has come to dominate both theoretical and practical approaches to tourism development over the last two decades. It extends the sustainable tourism debate beyond the arguably managerialist blueprint and destination focused approach that continues to characterise even the most recent sustainability agenda within tourism development. Reviewing the evolution of the sustainable tourism development concept its contemporary manifestations in academic literature and policy developments and processes the author compares its limitations to prevailing political, economic, socio-cultural and environmental contexts. He then proposes alternative approaches to tourism development which nevertheless retain environmental sustainability as a prerequisite of tourism development. This book also acts as an introduction to the Earthscan series Tourism, Environment and Development. About the series Tourism, Environment and Development aims to explore within a variety of contexts the developmental role of tourism as it relates explicitly to its environmental consequences. Each book will review critically and challenge traditional perspectives on sustainable tourism development exploring new approaches that reflect contemporary economic, socio-cultural and political contexts **Sustainable Tourism Development** George McIntyre, Arlene Hetherington, Edward Inskeep, World Tourism Organization, 1993 **Tourism, Development and Growth** Salah Wahab, J. J. J. Pigram, 1997

Distinguishing between sustainable development and sustainable tourism the authors examine whether and in what form tourism can contribute to sustainable development and growth. Focusing on different types of tourism appropriate to particular situations the team of leading contributors draws on examples from around the world Canada, USA, Spain, Belgium, UK, Australia to explore tourism's contribution to the economic, social, political and environmental advancement of developing countries and the importance of tourism in industrialised nations. This book examines the new policies and initiatives

established by both the private sector and the state to pursue sustainable tourism growth and identifies the opportunities and challenges inherent in achieving it

Tourism and Development Richard Sharpley,David J. Telfer,2002 This text explores the role of tourism as a potential contributor to socio economic development in destination areas Establishing a link between tourism studies and development studies it considers what is meant by development the processes through which development may be achieved and in particular a number of fundamental issues related to the use of tourism as a development agent In so doing it challenges conventional thinking about the relationship between tourism and development

Tourism and Sustainable Economic Development Amedeo Fossati, Giorgio Panella,2012-12-06 For many countries tourism is an industry of great economic significance it is seen as a main instrument for regional development as it stimulates new economic activities Tourism may have a positive economic impact on the balance of payments on employment on gross income and production but it may also have negative effects particularly on the environment Questions arise as to whether it is possible to keep on developing tourism in a certain area without negative or irreversible influences on the environment Tourism and Sustainable Economic Development provides a theoretical framework for these problems as well as practical illustrations on the following topics the conditions under which specialization in tourism is not harmful for economic growth the trade offs if any between tourism development and economic growth the need for government intervention and the various policy options and instruments available to policy makers The book comprises two parts The first part presents general views on tourism and sustainable economic development and some opinions on the relationship between tourism and the environment Some of the basic concepts implicit in sustainability are examined in relation to regional development urban tourism art cities and rural tourism The second part of the book concentrates on strategies and policy instruments The purpose is to concisely define and bring together some policies which appear to be necessary and whose implementation is required if we are to reconcile tourism development with the protection and conservation of the environment Some analytical tools for policy making with regard to tourism and the environment are developed As will become clear there are many gaps in our knowledge that need to be filled if we are to be successful in controlling tourism in a way that puts this important industry onto a sustainable development path

Tourism, Planning, and Community Development Rhonda Phillips, Sherma Roberts,2013-09-13 The intersection of community development tourism and planning is a fascinating one Tourism has long been used as a development strategy in both developed and developing countries from the national to local levels These approaches have typically focused on economic dimensions with decisions about tourism investments policies and venues driven by these economic considerations More recently the conversation has shifted to include other aspects social and environmental to better reflect sustainable development concepts Perhaps most importantly is the richer focus on the inclusion of stakeholders An inclusionary participatory approach is an essential ingredient of community development and this brings both fields even closer together It reflects an approach aimed at building on strengths in communities and

fostering social capacity and capital In this book the dimensions of the role tourism plays in community development are explored A panoply of perspectives are presented tackling such questions as can tourism heal How can tourism development serve as a catalyst to overcome social injustices and cultural divides This book was originally published as a special issue of *Community Development* Tourism and Development in the Developing World David J.
