Graduate School, 1915 **Sotheran's Price Current of Literature** Henry Sotheran Ltd, 1890 The EU's Decision Traps Gerda Falkner, 2011-05-12 Fritz W Scharpf's renowned model of the joint decision trap suggests that the requirements of nearly unanimous decisions in the EU's Council of Ministers combined with conflicting preferences among member governments will systematically limit the problem solving effectiveness of European policies However certain conditions have significantly changed in the 25 years since the theory was first posited In particular the unanimity rule has been replaced by qualified majority voting in most issue areas and successive rounds of enlargement have augmented the

diversity of member state interests and preferences This volume examines the continued relevance of the model It presents a comparative study on the differential politics in EU policies Looking at the political dynamics in an array of EU activities it analyses breakthroughs as well as stalemates and asks why leaps occur in some areas whilst blockages characterise others The dynamics that allow the EU to escape various forms of decision trap are analysed in depth including those suggested by rationalist theorists supranational hierarchical steering treaty base games and arena shifting and those suggested by constructivist approaches socialisation The volume concludes that when the EU is confronted with a high degree of problem pressure in a given issue area these mechanisms will often not be available because most remain outside politicians immediate grasp

Developments in West European Politics 2 Paul Heywood,Erik Jones,Martin Rhodes,2002 This replacement volume of *Developments in West European Politics* adopts a reconceived framework focusing centrally on the capacity legitimacy effectiveness and resilience of the states of Western Europe and the challenges they face at the start of the 21st century Bringing together specially commissioned chapters by leading authorities it should be useful reading for students and specialists alike
