For many years I have been interested in computer chess and have collected almost every learned paper and article on the subject that I could find My files are now quite large and a considerable amount of time effort and expense has been required to build up this collection I have often thought how difficult it must be for many computer chess enthusiasts to acquire copies of articles that they see referenced in some other work Unless one has access to a good reference library the task is almost impossible I therefore decided to try to make available in one volume as many as possible of the most interesting and important articles and papers ever written on the subject Such a selection is naturally somewhat subjective and I hope that I will not offend authors whose works have been excluded In particular I have decided to exclude any material which has appeared in the Journal of the International Computer Chess Association ICCA or in its precursor the ICCA Newsletter The reason is simply that the ICCA itself is in the process of compiling a compendium containing the most important material published in those sources For further information on ICCA membership and publications the reader is invited to contact Professor H 1 van den Herik or Dr Jonathan Schaeffer University of Limburg Computing Science Dcpaitment Department of Computer Science University of Alberta 6200 MD Maastricht Edmonton Netherlands Alberta Canada T6G 2HI **Scientific and Technical Books and Serials in Print**, 1984 **Chess Life**, 1986 Readers' Guide to Periodical Literature Anna Lorraine Guthrie, Bertha Tannehill, Neltje Marie Tannehill Shimer, 1988 An author subject index to selected general interest periodicals of reference value in libraries **The British National Bibliography** Arthur James Wells, 1999 *Personal Computing*, 1980-07 **Computer Digest**, 1974 **The Secret Guide to Computers** Russ Walter, 1994 PC Mag, 1989-02-28 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **The Secret Guide to Computers 2003** Russ Walter, 2002-08 *Waterstone's Guide to Books* Waterstone & Co, 1988 *InfoWorld*, 1982-01-25 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects **Illustrated Computer Dictionary For Dummies** Dan Gookin, Sandra Hardin Gookin, 1998-01-21 Jargon acronyms and technobabble explained in plain English Includes the latest Internet lingo Your indispensable desk reference for the information age Do your eyes glaze over when people start talking about high tech topics Are you in danger of becoming a computer illiterate Relax With this friendly easy to understand dictionary at your side you ll be able to figure out the difference between RAM and ROM and talk intelligently about everything from ANSI and ASCII to Yahoo and ZMODEM Discover how to Understand over 2 000 high tech terms Decipher all those puzzling acronyms Avoid embarrassment at electronics stores Join in conversations about computers
