Computing As Writing Daniel Punday:

Computing as Writing Daniel Punday, 2015-12-15 This book examines the common metaphor that equates computing and writing tracing it from the naming of devices notebook computers through the design of user interfaces the desktop to how we describe the work of programmers writing code Computing as Writing ponders both the implications and contradictions of the metaphor During the past decade analysis of digital media honed its focus on particular hardware and software platforms Daniel Punday argues that scholars should instead embrace both the power and the fuzziness of the writing metaphor as it relates to computing which isn't simply a set of techniques or a collection of technologies but also an idea that resonates throughout contemporary culture He addresses a wide array of subjects including film representations of computing Desk Set The Social Network Neal Stephenson's famous open source manifesto J K Rowling's legal battle with a fan site the sorting of digital libraries subscription services like Netflix and the Apple versus Google debate over openness in computing Punday shows how contemporary authors are caught between traditional notions of writerly authority and computing's emphasis on doing things with writing What does it mean to be a writer today Is writing code for an app equivalent to writing a novel Should we change how we teach writing Punday's answers to these questions and others are original and refreshing and push the study of digital media in productive new directions

Sensations of History James J. Hodge, 2019-10-01 A phenomenological investigation into new media artwork and its relationship to history What does it mean to live in an era of emerging digital technologies Are computers really as antihistorical as they often seem Drawing on phenomenology's investigation of time and history Sensations of History uses encounters with new media art to inject more life into these questions making profound contributions to our understanding of the digital age in the larger scope of history Sensations of History combines close textual analysis of experimental new media artworks with in depth discussions of key texts from the philosophical tradition of phenomenology Through this inquiry author James J Hodge argues for the immense significance of new media art in examining just what historical experience means in a digital age His beautiful aphoristic style demystifies complex theories and ideas making perplexing issues feel both graspable and intimate Highlighting underappreciated vibrant work in the fields of digital art and video Sensations of History explores artists like Paul Chan Phil Solomon John F Simon and Barbara Lattanzi Hodge's provocative interpretations which bring these artists into dialogue with well known works are perfect for scholars of cinema media studies art history and literary studies Ultimately Sensations of History presents the compelling case that we are not witnessing the end of history we are instead seeing its rejuvenation in a surprising variety of new media art

Digital Narrative Spaces Daniel Punday, 2021-12-30 There is a broad consensus that digital narrative is spatial but what this critical term means and how it is used varies greatly depending on the discipline from which it is approached Digital Narrative Spaces brings together essays by prominent scholars in electronic literature and other forms of digital authorship to explore the relationship between story and space across these disciplines This

volume includes an introduction with Marie Laure Ryan's typology of space followed by thought provoking individual chapters which explore innovative explorations of electronic literature locative media literary tourism and the mapping of real world literary spaces The collection closes with an essay analyzing continuities and discontinuities in theory of space across the chapters This volume will provide an important framework for establishing a dialogue across disciplines and future scholarship in these fields *Mosaic*, 2013-03 **Current Index to Journals in Education**, 1993 **Writing for Computer Science** Justin Zobel, 2004 Computers & Composing Jeanne W.
