

Ophthalmology Fellowship Personal Statement

We were walking down 33rd Street in New York City, surrounded by buildings wrapped as giant Xmas presents, 10 feet toy soldiers and glimmering reflections in every department store window. I kept tagging my mother's hand with amazement and glee and with each tug, she looked down at me with affection. The day could not have gone better, when we passed a doorway and there crouched in a corner was a man in filthy, torn clothes huddling tightly in the corner. What made me even sadder was the sight of him clutching a frail, soiled yellow lab. Looking closer, I saw that the dog was wearing a bent and twisted harness. Overwhelmed by what was before me, I suddenly realized, the man sitting there was totally blind. The moment I made the connection instinctively I pulled every penny of Xmas money out of my pockets and through tears placed it between Mr. Stevens' hands. My mother, who had been talking to a policeman, returned and started to pull me with a stream of admonishments. Then, instantly, she apprehended what had actually occurred and let me linger in conversation only leaving to bring Mr. Stevens and Jack a couple of hotdogs.

I did not realize it then but that was the most moving and indelible moment of my childhood. As the years went by, the gift of sight and its loss stayed with me through high school and college biology projects and whenever I did charitable work this was my cause. Thus the choice to specialize in ophthalmology during clinical rotations, was so natural it felt I been on this road my entire life. As I began formal study in the anatomy, function and diseases of the eye, knowing I was preparing for challenges as diverse as the right contact lens prescription to decisions whether to undertake delicate eye surgeries. The choice to subspecialize in Pediatric Ophthalmology was a direct product of my intolerance that any child should be so afflicted. As I studied the medical and surgical management of strabismus, amblyopia, genetic and developmental abnormalities and a wide range of inflammatory, traumatic and neoplastic conditions occurring in the first two decades of life, there seemed a sense of the completion of a cycle. While Mr. Stevens' and Jack were both long gone then, every day I entered the pediatric wards I imagined them both smiling at me.
