Cosmopolis and Truth Bernhard Radloff, 1996 The project of modernity inaugurated by the Enlightenment typically posits Reason as the ultimate ground of self reliant humanity Melville's critique of modernity questions this project in essential respects The social order of Melville's cosmopolis signifies an order of instrumental rationality that appeals to reason benevolence and confidence as cultural values which serves the secret fanaticism of public opinion and which is devoted to the reformation of the natural man Under the dictatorship of instrumental reason the classical concept of the search for self knowledge gives way to the manipulation of appearances truth is reduced to a coherent show and history to a
