Contemporary Pakistani Speculative Fiction and the Global Imaginary Shazia Sadaf, Aroosa Kanwal, 2023-09-26 As the first book length study of emergent Pakistani speculative fiction written in English this critical work explores the ways in which contemporary Pakistani authors extend the genre in new directions by challenging the cognitive majoritarianism usually Western in this field Responding to the recent Afro science fiction movement that has spurred non Western writers to seek a democratization of the broader genre of speculative fiction Pakistani writers have incorporated elements from djinn mythology Qur anic eschatology Desi South Asian traditions local

folklore and Islamic feminisms in their narratives to encourage familiarity with alternative world views In five chapters this book analyzes fiction by several established Pakistani authors as well as emerging writers to highlight the literary value of these contemporary works in reconciling competing cognitive approaches blurring the dividing line between possibilities and impossibilities in envisioning humanity's collective future and anticipating the future of human rights in these envisioned worlds

The Last Hope: A Dystopian Science Fiction Tale Sudhakar, 2023-07-15 In *The Last Hope A Dystopian Science Fiction Tale* the subchapter titled *The Collapse of Society* delves into the chilling and thought provoking concept of a world teetering on the edge of destruction Addressed primarily to parents this subchapter explores the themes and genres of science fiction particularly focusing on dystopian science fiction space opera cyberpunk time travel and steampunk Dystopian science fiction has long captivated readers with its portrayal of post apocalyptic worlds and the social and political implications that arise in such settings It forces us to confront the potential consequences of societal collapse and the fragility of our own civilization As parents it is essential to explore these themes as they prompt discussions about the importance of empathy resilience and critical thinking in an uncertain future

Indefensible Space Michael Sorkin, 2013-05-13 Showing how the upswell of paranoia and growing demand for security in the post 9 11 world has paradoxically created widespread insecurity these varied essays examine how this anxiety laden mindset erodes spaces both architectural and personal encroaching on all aspects of everyday life Starting from the most literal level barricades and barriers in front of buildings beefed up border patrols gated communities safe rooms to more abstract levels enhanced surveillance at public spaces such as airports increasing worries about contagion the psychological predilection for fortified space the contributors cover the full gamut of securitized public life that is defining the zeitgeist of twenty first century America

Understanding Computer Game Culture Jan van Looy, 2010 In recent years the banking industry has undergone a huge transformation These transformations can be attributed to the emergence of new financial technologies Among these new technologies online banking can be identified as one of the main innovations playing a central role in the transformation of the banking landscape However though new technologies have proven to be a profitable solution for most banks in their operations the challenges of adopting new technologies have never been more challenging This book presents a systematic approach and a model on the adoption of new technologies with examples drawn from the banking sector The focus is from a managerial and strategy perspective in identifying the factors that are required to prompt the adoption and successful management of a new technology

The Criticism behind Gattaca's Genetic Apartheid Scenario Myriam Nickels, 2017-06-28 Seminar paper from the year 2016 in the subject English Language and Literature Studies Other grade 1 3 University of Koblenz Landau Anglistik language English abstract The new advances and tendencies in the application of genetic science

evoke ethical social and legal concerns as the immense progress in genetics is a double edged sword On the one hand the completion of the Human Genome Project at the beginning of the 21st century and the recent progress in genetics come along with obvious benefits in genomic medicine such as better diagnosis of diseases and gene therapy However on the other hand the new genetics bring along worries that the new genetics could lead to a society that is less tolerant of disability and genetic diversity Moreover after successfully having intervened in the transformation of animals and plants to human s liking humans are now on the verge of manipulating the human genome so as to perfect the human species possibly since the necessary genetic technology is now available The movie Gattaca builds upon the scientific and technological advances in genetics in the late 20th century and displays a dystopian not too distant future In the portrayed future excessive genetic screening and embryo manipulation have brought about a rigidly hierarchical society grounded on genetic discrimination Undeniably there is an insurmountable social gap between these two classes Gattaca thoughtfully portrays the lives of different people trapped in these social categories and the special burdens they have to bear in such a society which is obsessed with genetic perfection A distinct two tiered society structure is the result of liberal eugenic practices and the unquestioned belief in genes being the determinants of an individual s life Niccol constructs a profoundly dystopian future which results from of the utopian quest to eradicate imperfections in society and genetically perfect humankind As Nicolas Pethes postulates science fiction possesses the possibility to prearrange real science and to picture outcomes that have not yet happened 177 and to articulate the current cultural image of science 169 Hence I read Gattaca as a genetic apartheid scenario to show how it comments on the advance in genetics in a critical way It is not possible to dismiss that the visions of the dystopian movie can be easily tied in with the contemporary genetic advances of our society and the hereby evoked ethical social and legal controversies and obstacles
