Deserts On The March Conservation Classics:

Deserts on the March Paul Bigelow Sears, 1937 **Man in the Landscape** Paul Shepard, 2010-07-01 A pioneering exploration of the roots of our attitudes toward nature Paul Shepard's most seminal work is as challenging and provocative today as when it first appeared in 1967 *Man in the Landscape* was among the first books of a new genre that has elucidated the ideas, beliefs, and images that lie behind our modern destruction and conservation of the natural world Departing from the traditional study of land use as a history of technology this book explores the emergence of modern attitudes in literature, art, and architecture their evolutionary past and their taproot in European and Mediterranean cultures With humor and wit Shepard considers the influence of Christianity on ideas of nature the absence of an ethic of nature in modern philosophy and the obsessive themes of dominance and control as elements of the modern mind In his discussions of the exploration of the American West the establishment of the first national parks and the reactions of pioneers to their totally new habitat he identifies the transport of traditional imagery into new places as a sort of cultural baggage **Global Population** Alison Bashford, 2014-01-28 Concern about the size of the world's population did not begin with the population bomb in 1968 It arose in the aftermath of World War I and was understood as an issue with far-reaching ecological, agricultural, economic, and geopolitical consequences The world population problem concerned the fertility of soil as much as the fertility of women always involving both earth and life *Global Population* traces the idea of a world population problem as it evolved from the 1920s through the 1960s The growth and distribution of the human population over the planet's surface came deeply to shape the characterization of civilizations with different standards of living It forged the very ideas of development demographically defined three worlds and for some an aspirational one world Drawing on international conference transcripts and personal and organizational archives this book reconstructs the twentieth-century population problem in terms of migration, colonial expansion, globalization, and world food plans Population was a problem in which international relations and intimate relations were one *Global Population* ultimately shows how a geopolitical problem about sovereignty over land morphed into a biopolitical solution entailing sovereignty over one's person *Forthcoming Books* Rose Army, 1989-05 *Cadillac Desert* Marc Reisner, 1993-06-01 I've been thinking a lot about Cadillac Desert in the past few weeks as the rain fell and fell and kept falling over California much of which despite the pouring heavens seems likely to remain in the grip of a severe drought Reisner anticipated this moment He worried that the West's success with irrigation could be a mirage that it took water for granted and didn't appreciate the precariousness of our capacity to control it Farhad Manjoo *The New York Times* January 20, 2023 The definitive work on the West's water crisis *Newsweek* The story of the American West is the story of a relentless quest for a precious resource water It is a tale of rivers diverted and dammed of political corruption and intrigue of billion-dollar battles over water rights of ecological and economic disaster In his landmark book *Cadillac Desert* Marc Reisner writes of the earliest settlers lured by the promise of paradise and of the ruthless tactics

employed by Los Angeles politicians and business interests to ensure the city's growth. He documents the bitter rivalry between two government giants: the Bureau of Reclamation and the U.S. Army Corps of Engineers in the competition to transform the West. Based on more than a decade of research, *Cadillac Desert* is a stunning expose and a dramatic, intriguing history of the creation of an Eden, an Eden that may only be a mirage. This edition includes a new postscript by Lawrie Mott, a former staff scientist at the Natural Resources Defense Council that updates Western water issues over the last two decades, including the long-term impact of climate change and how the region can prepare for the future. *Ogallala* John Opie, 2000-01-01 In this new enlarged edition, John Opie updates his groundbreaking work on the environmental history of the Ogallala aquifer and plains farming. He addresses the impact of the 1996 Farm Bill, Federal Agricultural Improvement and Reform Act, and looks at the recent movement of industrial hog farming onto the plains. Opie also develops his argument for the plains as a moral geography, a view involving the recognition by society that it has an obligation to balance the responsibility for conserving natural resources with that for keeping a regional people, the family farmers, in operation.

Desert Passages Patricia Nelson Limerick, 1985 Traces the development of American attitudes toward the desert using case studies from many writers over the years. Religion and the New Ecology David M. Lodge, Christopher Hamlin, 2006 For many years, ecologists and the environmentalists who looked to ecology for authority depicted a dichotomy between a pristine, stable nature and disruptive human activity. Most contemporary ecologists, however, conceive of nature as undergoing continual change and find that flux of nature is a more accurate and fruitful metaphor than balance of nature. The contributors to this volume address how this new paradigm fits into the broader history of ecological science and the cultural history of the West and, in particular, how environmental ethics and ecotheology should respond to it. Their discussions ask us to reconsider the intellectual foundations on which theories of human responsibility to nature are built. The provisional answer that develops throughout the book is to reintegrate scientific understanding of nature and human values, two realms of thought severed by intellectual and cultural forces during the last two centuries. Religious reflection and practice point the way toward a new humility in making the tough decisions and trade-offs that will always characterize environmental management. Ecology has experienced a major paradigm shift over the last half of the twentieth century. This shift requires major rethinking of the relation of religion and environmental ethics to ecology because our scientific understanding of the nature side of that relationship has changed. This book is the first to my knowledge that is meeting this challenge head-on, and it is doing so in an exemplary way. J. Baird Callicott, University of North Texas. **Science News Letter**, 1948 *Trends*, 1970 **Subject Guide to Books in Print**, 2001 **Wild Earth**, 2002 Yale Forest School News, 1987 **Guide to Reprints** Albert James Diaz, 2008 *The Island Press Bibliography of Environmental Literature* Yale University. School of Forestry and Environmental Studies, 1993 Environmental professionals have long felt the need for a practical reference work that takes an interdisciplinary approach to environmental research. This comprehensive reference work lists books

monographs journals conference proceedings government reports and other publications that contain essential information for those working to solve environmental problems professionals researchers policymakers and students **Choice** ,2000

From The Land Nancy Pittman,1988 Articles from The Land a quarterly magazine first published by the Friends of the Land and dedicated to the conservation of Soil Rain and Man Back cover **Guide to Reprints** ,2008 **Literature of Nature** Patrick D.
