### **Inspiration and Design for Bio-Inspired Surfaces in Tribology: Emerging Research and Opportunities**

Abdel-Aal, Hisham,2020-07-03 Surface texturing has been recognized as a method for enhancing the tribological properties of surfaces for many years Adding a controlled texture to one of two faces in relative motion can have many positive effects such as reduction of friction and wear and increase in load capacity To date the true potential of texturing has not been realized due to the severe lack of detailed information about the mechanistic functional details of texturing in a tribological situation Inspiration and Design for Bio Inspired Surfaces in Tribology Emerging Research and Opportunities is a pivotal reference source that focuses on surface engineering techniques to mimic biological materials Highlighting a broad range of topics including bio mimetics contact analysis and thermodynamics this book is ideally designed for engineers

environmentalists academicians researchers and students     **Design and Science** Leslie Atzmon,2023-01-12 Design and Science addresses the inter relationship in both historical and contemporary contexts between design thinking and design processes and scientific and medical research methods Contributors address the parallels between research methodologies in design and the sciences both of which involve the recognition of an issue conceptualisation of ways to resolve it and then the modelling and implementation of a viable solution Much research across various scientific disciplines follows a similar pattern Thematic sections explore visualisation visual narrative and visual metaphor biodesign and biomimicry makers and users in design and science and data visualisation discussing the role of data from nature as an ultimate source of design
