Capital And Community:

Capital and Community Jacques Camatte, 2011-10-17 One has to establish a chronology of Marx's works on economics in order to understand the importance of this unpublished chapter of Capital all the more so because Marx was unable to complete this work. It is vital to discover the common framework, the central preoccupation around which all the works are orientated. Marx himself indicated the line of their development. Two main questions emerge from all these works, be they completed or as plans and sketches: 1. the origin of value, its characteristics and forms; 2. the origin of the free worker, the wage labourer. We shall deal with them in this order and analyse the consequences they imply. **An Introduction to**

Community Development Rhonda Phillips, Robert Pittman, 2008-12-02 Comprehensive and practical, this textbook enables students to connect academic study and professional know-how and demonstrates how to best plan the rebuilding, revitalization and development of communities utilizing a wide variety of economic and strategic tools. Features include chapter outlines, text boxes, key words and references. **Lost Classroom, Lost Community** Margaret F. Brinig, Nicole Stelle Garnett, 2014-04-11

In the past two decades in the United States more than 1,600 Catholic elementary and secondary schools have closed and more than 4,500 charter schools, public schools that are often privately operated and freed from certain regulations, have opened, many in urban areas. With a particular emphasis on Catholic school closures, *Lost Classroom, Lost Community* examines the implications of these dramatic shifts in the urban educational landscape. More than just educational institutions, Catholic schools promote the development of social capital, the social networks and mutual trust that form the foundation of safe and cohesive communities. Drawing on data from the Project on Human Development in Chicago Neighborhoods and crime reports collected at the police beat or census tract level in Chicago, Philadelphia and Los Angeles, Margaret F. Brinig and Nicole Stelle Garnett demonstrate that the loss of Catholic schools triggers disorder, crime and an overall decline in community cohesiveness and suggest that new charter schools fail to fill the gaps left behind. This book shows that the closing of Catholic schools harms the very communities they were created to bring together and serve and it will have vital implications for both education and policing policy debates. **Capital, Community and Jobs** Canadian

Labour Market and Productivity Centre, 1998. **Social Capital at the Community Level** John M. Halstead, Steven C. Deller, 2015-04-24 In *Social Capital at the Community Level*, John Halstead and Steven Deller examine social capital formation beyond the individual level through a variety of disciplines: planning, economics, regional development, sociology, as well as non-traditional approaches like engineering and built environmental features. The notion of social capital in community and economic development has become a focus of intense interest for policy makers, practitioners and academics. The notion is that communities with higher levels of social capital, networks, trust and norms will prosper both economically and socially. In a practical sense, how do communities use the notion of social capital to build policies and strategies to move their community forward? Are all forms of social capital the same and do all have a positive influence on the community? To help

gain insights into these fundamental questions Social Capital at the Community Level takes a holistic interdisciplinary or systems approach to thinking about the community While those who study social capital will acknowledge the need for an interdisciplinary approach most stay within their disciplinary silos One could say there is strong bonding social capital within disciplines but little bridging social capital across disciplines The contributors to Social Capital at the Community Level have made an attempt to build that bridging social capital While disciplinary biases and research approaches are evident there is significant overlap about how people with different disciplinary perspectives think about social capital and how it can be applied at the community level This can be from neighborhoods addressing a localized issue to a global response to a natural disaster This book is an invaluable resource for scholars researchers and policy makers of community and economic development as well as rural sociologists and planners looking to understand the opaque process of social capital formation in communities
