

## Electrical Hookup

Refer to Figure 4

Plug Velocity electrical lead in tractor wiring-pin connector. If your tractor is not equipped with a wiring-pin connector, contact your dealer for installation.

Test the lights and signaling prior to highway movement.

Figure 4  
Lighting Connector

## Hydraulic Hose Hookup

### ⚠ WARNING

#### High Pressure Fluid Hazard

Shut down tractor before making hydraulic connections. Only trained personnel should work with system hydraulics.

Recognizing that a under pressure can have sufficient pressure to penetrate the skin causing serious injury.

Use a piece of paper or cardboard, NOT BARE FINGERS, to check for leaks. Wear protective gloves and safety glasses or goggles when working with hydraulic systems. If an accident occurs, seek immediate medical attention from a physician familiar with this type of injury.

Refer to Figure 5

Color-Placed hydraulic hoses have color-coded handle grips to help you hookup hoses to your tractor controls. Hoses that go to the same tractor valve are marked with the same color.

#### Color-Coded Hose Handles

Color	Hydraulic Function
Black	Lift/Lower
Green	Right/Left
Red	Hydraulic Lock/Lift/Lower
Yellow	Emergency/Lift/Lower

To distinguish hoses on the same hydraulic circuit, refer to the symbol marked into the handle grip.

- Hoses with an extended-cylinder symbol feed cylinder hose ends.
- Hoses with a retracted-cylinder symbol feed cylinder rod ends.

Secure hoses and cables so that they have sufficient slack for hook movements, but cannot get caught between moving parts of tractor, Velocity or hitch. Failure to safely route and secure hoses and cables could result in damage requiring component replacement, and lost field time.

Close all hydraulic couplings and hook to tractor.

Figure 5  
Color-Coded Hose Handles

## Choke Hook

Refer to Figure 6

The fuel hitch must be upright (with the recessed notch on the bottom) for this configuration. Then place the longer weight on the fuel hitch, and use the choke. (15)

- Select one each:
  - (15) 800-1000' 100% 1/2" (1/2")
  - (16) 800-1000' 100% 1/2" (1/2")
  - (17) 800-1000' 100% 1/2" (1/2")
- With the square-shaped end of the choke (15) up, fully seat the choke in the upright fuel hitch (16). Insert the Grade 9 bolt (17) from below. Secure with lock nut (18).

### ⚠ CAUTION

#### Block Failure Hazard

Insert the hook into and assemble the choke parts on choke. Incorrect installation or assembly may result in failure of the choke body, leading to hook failure. This could result in a serious highway accident or serious machine damage.

#### Category III Hitch

The fuel hitch (15) must be inserted (with the recessed notch on the top) for this configuration. Set the Y-hitch (14) to allow some vertical articulation of the draw bar pin. Always use at least one cushion (15).

- Select one of each:
  - (14) 1000-1500' 100% 1/2" (1/2")
  - (15) 1000-1500' 100% 1/2" (1/2")
  - (16) 1000-1500' 100% 1/2" (1/2")
  - and two:
    - (17) 1000-1500' 100% 1/2" (1/2")
- Set the cushions inside the hitch recess, just forward of the vertical fuel hitch. Position the Y-hitch (14) forward of the cushions and check the size of the mounting pinning hole. Remove a cushion (15) if needed.
- Add the top plate (18). Secure from below with Grade 9 bolt (19).
