Reading Actively in Middle Grade Social Studies Don K. Philpot, 2019-08-14 Middle grade students can learn a great deal about themselves and their world by reading informative texts in social studies courses. These texts will focus on important topics in history, geography, civics, government, and economics, and offer students a range of perspectives on past and present social events. But reading is a complex act, and most students need specific reading related support to understand assigned texts in middle grade social studies courses. This book focuses on the cyclical nature of reading the actions proficient readers engage in to understand social studies textbooks and other informational texts, and the instructional support that teachers can provide to enhance middle grade students' learning of social studies content through reading. Three associated questions will be addressed in this book: What actions do proficient readers engage in to understand assigned course texts? What do these actions entail, and how do they relate to each other? What teacher mediated practices best support middle grade students' development as proficient readers and enhance their learning of course content through reading?

Knowing the Score David Papineau, 2017-05-02 In *Knowing the Score*, philosopher David Papineau uses sports to illuminate some of modern philosophy's most perplexing questions. As Papineau demonstrates, the study of sports clarifies challenges and sometimes confuses crucial issues in philosophy. The tactics of road bicycle racing shed new light on questions of altruism, while sporting family dynasties reorient the nature v. nurture debate. Why do sports competitors choke? Why do fans think God will favor their team over their rivals? How can it be moral to deceive the umpire by framing a pitch? From all of these questions and many more, philosophy has a great deal to learn. An entertaining and erudite
