## *Chapter 15 Concepts & Vocabulary*

**HMS Beagle** - the name of the ship that he went on

**Charles Darwin (biography)**- he is a naturalist, which collects fossils and identify them and their

**What three things did Charles Darwin collect?** Darwin collected finches, mockingbirds, and

**What did Charles Darwin infer?** Darwin inferred that if humans could change species by artificial selection, then perhaps the same process could work in nature.

**What did Charles Darwin hypothesize?** Darwin hypothesized that new species could appear gradually through small changes in ancestral species

**What country did Charles Darwin set sail from?** Darwin set sail from England

**Galapagos Island**- 13 islands off the coast of Ecuador

**Artificial selection**- selective breeding of plants and animals to promote the occurrence of desirable traits in offspring

**Natural selection (Definition & Purpose of Who wants to live a million years)** Natural selection is the process whereby organisms better adapted to their environment tend to survive and produce more offspring. The purpose of who wants to live a million years was to test which species would best adapt to the environment they were put into and whichever one lived the longest was the best adapted/evolved species.

**Four principles of natural selection**- Individuals in a population show variations, variations can be inherited, organisms have more offspring that can survive on available resources, and Variations that increase reproductive success will have a greater chance of being passed on.

**Evolution**- the process by which different kinds of living organisms are thought to have developed and diversified from earlier forms during the history of the earth

**The origin of species by means of natural selection (What was the book about?)**- The book was about Darwin's theory of evolution and his findings that supported his data

**Fossil record (What are two things can a fossil record tell you?)**- Fossil provide a record of species that lived long ago. Two things a fossil record can tell you is that ancient specie share similarities with species that now live on Earth and the ancient Glyptodon have been compared to modern day armadillos.

**Derived trait (Give an example)**- feathers

**Ancestral trait (Give an example)**- tails
