New chapters consider causation, the influence and role of social contexts and social support, ADHD teacher knowledge and parental engagement. The new content presents us with fresh ideas and approaches. Katherine Bilton, University of Alaska USA. This new edition of The Handbook of Emotional and Behavioural Difficulties, first published in 2004, has been completely reworked and refreshed by a new editorial team led by Philip Garner. A thorough revision of existing content together with new material bring the volume firmly up to date and offers guidance and recommendations for future research and practice. Covering a range of important issues in EBD, chapters are organized into five main parts: Contexts, Definitions and Terminologies, Roots, Causes and Allegiances, Strategies and Interventions, Training and Professional Development, Enhancement, EBD Futures, Challenges and Opportunities. With an impressive array of UK, US and other international contributors, the Handbook will be indispensable for undergraduate and Master's level students pursuing Teacher Training, Educational and Developmental Psychology and Special Education courses. It will also be valuable to social workers, counsellors, school educational psychologists and other practitioners in relevant fields.

[The Secondary English Magazine](#), 2005 **The Kansas City Medical Index-lancet**, 1909 *Language, Culture, Computation: Computing for the Humanities, Law, and Narratives* Nachum Dershowitz, Ephraim Nissan, 2014-12-04 This Festschrift volume is published in honor of Yaakov Choueka on the occasion of his 75th birthday. The present three volumes, *liber amicorum*, several years in gestation, honour this outstanding Israeli computer scientist and is dedicated to him and to his scientific endeavours. Yaakov's research has had a major impact not only within the walls of academia but also in the daily life of lay users of such technology that originated from his research. An especially amazing aspect of the temporal span of his scholarly work is that half a century after his influential research from the early 1960s a project in which he is currently involved is proving to be a sensation as will become apparent from what follows. Yaakov Choueka began his research career in the theory of computer science dealing with basic questions regarding the relation between mathematical logic and automata theory. From formal languages Yaakov moved to natural languages. He was a founder of natural language processing in Israel, developing numerous tools for Hebrew. He is best known for his primary role together with Aviezri Fraenkel in the development of the *Responsa Project*, one of the earliest fulltext retrieval systems in the world. More recently he has headed the *Friedberg Genizah Project* which is bringing the treasures of the Cairo Genizah into the Digital Age. This second part of the three volume set covers a range of topics related to the application of information technology in humanities, law and narratives. The papers are grouped in topical sections on: humanities computing, narratives and their formal representation, history of ideas, the numerate disciplines, law, computer law and legal computing.
