geology and anthropology that demonstrates Darwin's keen powers of observation written at a time when Western Europeans were exploring and charting the whole world. Although Darwin revisited some areas during the expedition for clarity, the chapters of the book are ordered by reference to places and locations rather than by date. Darwin's notes made during the voyage include comments illustrating his changing views at a time when he was developing his theory of evolution by natural selection and includes some suggestions of his ideas particularly in the second edition of 1845.

Charles Darwin's Notebooks, 1836-1844 Charles Darwin, Paul H. Barrett, 1987

Charles Darwin's On the Origin of Species Michael Keller, 2009-10-27 A stunning graphic adaptation of one of the most famous, contested, and important books of all time. Few books have been as controversial or as historically significant as Charles Darwin's *On the Origin of Species by Means of Natural Selection, or the Preservation of Favoured Races in the Struggle for Life*. Since the moment it was released on November 24, 1859, Darwin's masterwork has been heralded for changing the course of science and condemned for its implied challenges to religion. In *Charles Darwin's On the Origin of Species*, author Michael Keller and illustrator Nicolle Rager Fuller introduce a new generation of readers to the original text. Including sections about his pioneering research, the book's initial public reception, his correspondence with other leading scientists, as well as the most recent breakthroughs in evolutionary theory, this riveting, beautifully rendered adaptation breathes new life into Darwin's seminal and still polarizing work.

Darwin and Women Charles Darwin, 2017-01-05 *Darwin and Women* focusses on Darwin's correspondence with women and on the lives of the women he knew and wrote to. It includes a large number of hitherto unpublished letters between members of Darwin's family and their friends that throw light on the lives of the women of his circle and their relationships, social and professional, with Darwin. The letters included are, by turns, entertaining, intriguing, and challenging, and are organised into thematic chapters including botany and zoology, as well as marriage and servants, that set them in an accessible narrative context. Darwin's famous remarks on women's intelligence in *Descent of Man* provide a recurring motif and are discussed in the foreword by Gillian

Beer and in the introduction The immediacy and variety of these texts make this an entertaining read which will suggest avenues for further research to students
