Proteinases Ben M. Dunn,2012-12-06 In September 1990 a group of 160 scientists from 19 countries and 21 of the United
States met at the Red Lion Inn in Rohnert Park Sonoma County California The purpose of this meeting was to share new
information from recent research on the Aspartic Proteinases This book is a compilation of the information transferred in that
forum The Aspartic Proteinases include all those enzymes from the fourth class of proteolytic enzymes the first three being
the Serine Cysteine and Metalloproteinases Of course all the scientists in attendance at the Sonoma Aspartic Proteinase
Conference would agree that our current level of understanding of the structure and function of the Aspartic Proteinase class
of enzymes is clearly first class The reasons for this require a bit of historical perspective The group of scientists who are
engaged in study of this family of enzymes first met as a separate entity in 1976 in Norman Oklahoma at a meeting organized
by Jordan Tang of the Oklahoma Medical Research Foundation This was an exciting time as the first crystal structures of
some of these enzymes were described by Blundell James and Davies During that conference the relationship between the
two halves of the mammalian and fungal enzymes was recognized and this has provided a structural foundation for analysis
of the retroviral enzymes which came later A book was published by Plenum Press documenting l this conference and the
current book is an update to that important work *Subject Guide to Books in Print* ,1983 *Hutchinson's Washington and*
