The Political Language of Food Samuel Boerboom, 2015-05-06. The Political Language of Food addresses why the language used in the production, marketing, selling and consumption of food is inherently political. Food language is rarely neutral and is often strategically vague, which tends to serve the interests of powerful entities. Boerboom and his contributors critique the language of food-based messages and examine how such language, including idioms, tropes, euphemisms, invented terms, etc., serves to both mislead and obscure relationships between food and the resulting community, health, labor and environmental impacts. Employing diverse methodologies, the contributors examine on a micro level the textual and rhetorical elements of food-based language itself. The Political Language of Food is both timely and important and will appeal to scholars of media studies, political communication and rhetoric.

Until Every Animal is Free Saryta Rodriguez, 2015-11-03. Until Every Animal is Free is an insightful, candid work heralding the Animal Liberation Movement as the next logical step on the path of social justice, dispelling many of the myths that keep us from getting there. In it, Saryta Rodriguez challenges the Myth of Human Supremacy and explores some of the ideological pillars behind the belief that humans are superior to all other animals. This book also discusses animal liberation theory as well as primarily twenty-first century efforts to put animal liberation on the public agenda.

The Communication Scarcity in Agriculture Jessica Eise, Whitney Hodde, 2016-07-15. Today the general public craves information on food and agriculture with an unprecedented passion. But the agricultural sector, unaccustomed to an interested and inquisitive society, has largely failed to respond to the public's demands for information. Instead, corporations time-pressed journalists, bloggers, media celebrities, film makers, authors and concerned consumers jumped in to fill the void. Food is emotional and these players, some well intentioned and others not, got a lot of traction playing off consumer fears of the unknown. This critical and timely book explains how changing demographics, cultural shifts, technological advances and agriculture's silence all combined to create the perfect storm, a great chasm between those who know and those who don't know agriculture. The ramifications of a poorly informed consumer base are now becoming clear in our policy debates and consumer-driven business decisions. There is a lot of common ground between the agricultural sector and their consumer base, but each group largely fails to appreciate it and the consequences of such a divide grow increasingly dire. Drawing on a wide range of expertise from leading agricultural researchers to major agribusiness leaders to consumer advocates, Eise and Hodde lay out exactly why communication is so urgently critical to our modern-day agricultural system. They outline the major themes affecting agricultural communication: perception, emotion, technology, science and what we can do now to improve the debate and safeguard our future food supply for generations to come. This book is suitable for those who study agriculture, environmental economics and mass media and communication.
