the efficacy of chiropractic care is still in its early stages even though knowledge of chiropractic science has been around to some degree as long as recorded time Early chiropractors were jailed and they were publicly mocked by the medical community as charlatans and quacks Until a brave group of doctors took on the powerful AMA and exposed an illegal conspiracy to destroy chiropractic Here is a brief summary of the result Summary of Judge s Opinion and Order On August 27 1987 Judge Susan Getzendanner United States District Judge for the Northern District of Illinois Eastern Division found the American Medical Association The American College of Surgeons and The American College of Radiology guilty of having conspired to destroy the profession of chiropractic in the United States In a 101 page opinion Judge Getzendanner ruled that the American Medical Association and its co conspirators had violated the Sherman Antitrust Laws of the United States Judge Getzendanner ruled that they had done this by organizing a national boycott of doctors of chiropractic by medical physicians and hospitals using an ethics ban on interprofessional cooperation Evidence at the trial showed that the defendants took active steps often covert to undermine chiropractic educational institutions conceal evidence of the usefulness of chiropractic care undercut insurance programs for patients of chiropractors subvert government inquiries into the efficacy of chiropractic engage in a massive misinformation campaign to discredit and destabilize the chiropractic profession and engage in numerous other activities to maintain a medical physician monopoly over health care in this country **Sports Chiropractic** Robert D. [Strategic Planning for the Chiropractic Practice](#) Michael R. Wiles, 2007-07-23 Today's chiropractors are practicing in a very difficult and competitive environment They need to seriously plan and execute their practices the same way that successful business enterprises do Many fail not because they are poor clinicians but simply because their practices are not founded on a personal vision and based on a realistic action plan Strategic Planning for the Chiropractic Practice takes the reader from the development of a vision statement through a mission statement goals objectives and operational plans and a specific execution plan ***Chiropractic Peace*** William P. Palmer, 2018-08-13 Daniel David Palmer the father of chiropractic medicine sets out the principles of manually correcting disorders of the bones as a panacea for various ills of the human biology When he founded his practice of chiropractic medicine in the 1890s Palmer claimed to have received inspiration from a spiritual or divine force Although Palmer received criticism for frequently voicing this origin he remained steadfast in his account for the author there could be no successful science without religion and vice versa The adjustment of the osseous bone tissue considered by Palmer to hold spiritual religious and scientific importance as a remedy Chiropractic procedures surround manipulation of the musculo skeletal system with particular emphasis given to the spine Such adjustments of the bones are performed with the intent of improving posture reducing inflammation of tissue and promoting proper function of the nervous system **Chiropractic Medicine** Robert Hartmann McNamara, 2018-11-27 From

its very beginning chiropractic medicine has faced challenges about the scientific validity of the treatment and the credibility of its practitioners Since those early years many of these criticisms have remained but legislation licensure and litigation have created an environment where chiropractic care is allowed in all 50 states and licenses are required of all chiropractors who wish to practice medicine The implementation of the Affordable Care Act has changed the way insurance companies provide reimbursement for services by medical providers With a greater emphasis on administratively documenting how and in what ways a particular form of treatment actually improves a patient's health coupled with a greater level of restriction on the types of services medical providers can offer without justification and authorization many medical providers including chiropractors have had to re examine the services they provide and how they operate This study attempts to explore the life of chiropractors in light of all the historical and current changes taking place within the medical profession It also seeks to understand the external and internal threats posed to chiropractors with an eye towards understanding how and in what

ways the future of medicine will impact the chiropractic profession. Despite the projected growth of job opportunities for chiropractors between 2014 and 2024 which according to the U.S. Department of Labor is occurring at a much faster than average trajectory than other professions U.S. Department of Labor Statistics 2015 given the costs involved in completing chiropractic training which can exceed 200 000 coupled with the low salary recent data from the U.S. Department of Labor Statistics shows that the median salary for a chiropractor is 64 440 per year along with the challenges of sustaining an individual practice most chiropractors are self employed in solo practice these obstacles are formidable ones. This is particularly true in light of the recent development of large chiropractic chains such as the Joint that offer spinal and neck adjustments at a fraction of the cost of a traditional provider. This ethnographic study consisted of systematic observation and interviews of 40 chiropractors in South Carolina from Fall 2016 to Fall 2017. Additionally interviews were conducted with staff members patients and other medical providers such as physicians physical therapists massage therapists and representatives from the insurance industry about their understanding and experiences with chiropractic medicine. Phone interviews were also conducted with seven deans and provosts at chiropractic colleges around the country. In total over 100 interviews and informal conversations occurred during the course of the project. All identifiers of participants and chiropractic colleges in the study were removed to ensure anonymity. Instead pseudonyms were created that were known only by the author of the study. Additionally data from the South Carolina Department of Labor Licensing and Regulation was obtained to document changes in the number of chiropractors who are no longer in practice in the state between 2016 and 2017.
