Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged *Cli Fi and Class* focuses on the representation of class dynamics in climate change narratives With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad Cormac McCarthy and Octavia Butler to the film *Black Panther* and the Broadway musical *Hadestown* this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn [Teaching Climate Change to Adolescents](#) Richard Beach, Jeff Share, Allen Webb, 2017-05-25 THE essential resource for middle and high school English language arts teachers to help their students understand and address the urgent issues and challenges facing life on Earth today this text features classroom activities written and used by teachers and a website <http://climatechangeela.pbworks.com> with additional information and links All royalties from the sale of this book are donated to Alliance for Climate Education <https://acespace.org> **International Climate Protection** Michael Palocz-Andresen, Dóra Szalay, András Gosztom, László Sáros, Tímea Taligás, 2019-05-18 This book explains the current climate protection processes and technologies and informs the readers of the limiting factors and opportunities for future development It represents the highest level of knowledge from leading scientists all over the world Original high quality figures maximize understanding of the text The book also introduces a new concept climatographic which provides a well pronounced solution to climate protection that is easily understandable for all levels of readers **Anthropocene Reading** Tobias Menely, Jesse Oak Taylor, 2017-10-13 Few terms have garnered more attention recently in the sciences humanities and public sphere than the Anthropocene the proposed epoch in which a human signature appears in the lithostratigraphic record *Anthropocene Reading* considers the implications of this concept for literary history and critical method Entering into conversation with geologists and geographers this volume reinterprets the cultural past in relation to the anthropogenic transformation of the Earth system while showcasing how literary analysis may help us conceptualize this geohistorical event The contributors examine how a range of literary texts from *The Tempest* to contemporary dystopian novels to the poetry of Emily Dickinson mediate the convergence of the social institutions energy regimes and planetary systems that support the reproduction of life They explore the long standing dialogue between imaginative literature and the earth sciences and show how scientists novelists and poets represent intersections of geological and human timescales the deep past and a posthuman future political exigency and the carbon cycle Accessibly written and representing a range of methodological perspectives the

essays in this volume consider what it means to read literary history in the Anthropocene Contributors include Juliana Chow Jeffrey Jerome Cohen Thomas H Ford Anne Lise Fran ois Noah Heringman Matt Hooley Stephanie LeMenager Dana Luciano Steve Mentz Benjamin Morgan Justin Neuman Jennifer Wenzel and Derek Woods

Climate Fiction and Cultural Analysis Gregers Andersen, 2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term s descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term s speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally
