**Ubering: the “Rideshare” Story** Rafael Fermoselle, 2019-12-22 There are a few creations that have become products because they became dominant in the market and synonymous with an entire product category Genericized names include Frigidaire which became synonymous with refrigerator Xerox which became synonymous with photocopying and Kleenex which became synonymous with tissues That has been the case with Uber which has become identical with rideshare Despite rapid growth since 2010 Uber has not become profitable is carrying a cumulative loss of over 15 billion as of November 2019 and it is doubtful if it will ever become profitable Despite becoming an eponym a key component of the gig economy and inspiring numerous copycats there is no guarantee that Uber will be able to generate an adequate return on investment and remain in business The concept has fatal flaws that impair its legal soundness In the end consumers and society determine if any business succeeds or fails Government regulations are largely non partisan and exist to protect society the general welfare and the free enterprise system Uber and the ride share concept may be plowed under by regulations that exist to protect the public interest However regulations sometimes backfire and cause unintended consequences

**Asia in Washington** Kent E. Calder, 2014-04-23 For several centuries international relations has been primarily the purview of nation states Key powers have included at various times Great Britain France Japan China Russia then the U S S R and then Russia again and the nation most influential in international relations for the past several decades has been the United States But in a world growing smaller with a globalizing system increasing in complexity by the day the nation state paradigm is not as dominant as it once was In Asia in Washington longtime Asia

analyst Kent Calder examines the concept of global city in the context of international affairs The term typically has been used in an economic context referring to centers of international finance and commerce such as New York Tokyo and London But Calder extends the concept to political centers as well particularly in this case Washington D C Improved communications enhanced transportation greater economic integration and activity have created a new economic village and global political cities are arising within the new structure distinguished not by their CEOs or stock markets but by their influence over policy decisions and their amassing of strategic intelligence on topics from national policy trends to geopolitical risk Calder describes the rise of Washington D C as perhaps the preeminent global political city seat of the world s most powerful government center of NGO and multilateral policy activity the locale of institutions such as the World Bank and IMF and home to numerous think tanks and universities Within Washington the role of Asia is especially relevant for several reasons It represents the core of the non Western industrialized world and the most challenge to Western dominance It also raises the delicate issue of how race matters in international global governance a factor crucially important during a time of globalization And since Asia developed later than the West its changing role in Washington raises major issues regarding how rising powers assimilate themselves into global governance structure How do Asian nations establish increase and leverage their Washington presence and what is the impact on Washington itself and the decisions made there Kent Calder explains it all in Asia in Washington **Inform** ,2004 Information Wars Richard Stengel,2019-10-08 A well told insider account of the State Department s twenty first century struggle to defend America against malicious propaganda and disinformation The Washington Post Disinformation is nothing new When Satan told Eve nothing would happen if she bit the apple that was disinformation But today social media has made disinformation even more pervasive and pernicious In a disturbing turn of events authoritarian governments are increasingly using it to create their own false narratives and democracies are proving not to be very good at fighting it During the final three years of the Obama administration Richard Stengel former editor of Time was an Under Secretary of State on the front lines of this new global information war tasked with unpacking disproving and combating both ISIS s messaging and Russian disinformation Then during the 2016 election Stengel watched as Donald Trump used disinformation himself In fact Stengel quickly came to see how all three had used the same playbook ISIS sought to make Islam great again Putin tried to make Russia great again and we know the rest In Information Wars Stengel moves through Russia and Ukraine Saudi Arabia and Iraq and introduces characters from Putin to Hillary Clinton John Kerry and Mohamed bin Salman to show how disinformation is impacting our global society He illustrates how ISIS terrorized the world using social media and how the Russians launched a tsunami of disinformation around the annexation of Crimea a scheme that would became a model for future endeavors An urgent book for our times now with a new preface from the author Information Wars challenges us to combat this ever growing threat to democracy A refreshingly frank account revealing Kirkus Reviews This sobering book is indeed needed to help individuals better
