Effective communication skills are necessary for success in the business world and O'Rourke has written a highly readable book filled with anecdotes and examples to engage students in the learning process. The strategic approach is integrated throughout the book, allowing students to understand how a communicated message impacts the business as a whole. Case studies throughout the book provide students with hands-on experience of scenarios they will encounter in the real world. The book includes at least three dozen fresh classroom tested cases. An ethical thread is woven through the text demonstrating how ethical decision making can be applied in all aspects of communication. Separate chapters on technology including social media, intercultural communication, nonverbal communication and conflict management provide students with the skills to building relationships and influencing stakeholders key skills for any manager. A companion website includes comprehensive support material to teach this class.

## **The Political Language of Food**

Samuel Boerboom, 2015-05-06 The Political Language of Food addresses why the language used in the production, marketing, selling and consumption of food is inherently political. Food language is rarely neutral and is often strategically vague, which tends to serve the interests of powerful entities. Boerboom and his contributors critique the language of food based messages and examine how such language, including idioms, tropes, euphemisms, invented terms, etc., serves to both mislead and obscure relationships between food and the resulting community, health, labor and environmental impacts. Employing diverse methodologies, the contributors examine, on a micro level, the textual and rhetorical elements of food based language itself. The Political Language of Food is both timely and important and will appeal to scholars of media studies, political communication and rhetoric.
