this psychology that we can blunt its effects Grounded in years of study as well as Ariely's own experience as a target of disinformation Misbelief is an eye opening and comprehensive analysis of the psychological drivers that cause otherwise rational people to adopt deeply irrational beliefs Utilizing the latest research Ariely reveals the key elements emotional cognitive personality and social that drive people down the funnel of false information and mistrust showing how under the right circumstances anyone can become a misbeliever Yet Ariely also offers hope Even as advanced artificial intelligence has become capable of generating convincing fake news stories at an unprecedented scale he shows that awareness of these forces fueling misbelief make us as individuals and as a society more resilient to its allure Combating misbelief requires a strategy rooted not in conflict but in empathy The sooner we recognize that misbelief is above all else a human problem the sooner we can become the solution ourselves
