Environmental Law Codification in China Xiaobo Zhao, Noeleen McNamara, Gu Gong, Kaijie Wu, 2025-09-26 This book emerges from a series of research seminars and projects conducted over seven years at prestigious Chinese law schools and environmental research institutes focusing on the formulation of an Environmental Code in China Contributors many of whom have participated in these seminars and published in leading Chinese law journals provide readers with an insightful and

comprehensive guide to this significant endeavor. The primary objective of this book is to analyze the multifaceted aspects of environmental law codification in China against its unique legal, social, and political backdrop and its far-reaching impacts on environmental governance in the country. It delves into the necessity and methodologies of developing an environmental code tailored to China's specific environmental challenges, offering insider perspectives on procedural and substantive issues related to environmental law codification. This includes reviewing the theoretical underpinnings such as the necessity and feasibility of codifying environmental laws as well as discussing the structure and coverage of the proposed Environmental Code. Moreover, the book explores the interplay between the proposed environmental code and existing national laws such as the Constitution, Civil Code, Criminal Code, and the prospective Administrative Code of China. It examines key issues such as environmental rights, ecological and environmental liability, and low-carbon development within the context of the proposed Environmental Code. With contributions from counselors and judges of Chinese environmental courts, this book is positioned as an authoritative resource for environmental researchers and judges in this field.

Effective Environmental

Regulation in China Federico Pasini, 2021-06-16 Though recently improved, Chinese legislation on environmental permits is still weak and urgent measures are needed to help the country in moving towards an effective permitting system. This book examines this legislation gap and presents a contribution to solving China's pollution problems. By analysing the deficiencies of current Chinese provisions on permitting in light of EU legislation and its Italian application, the book determines which permitting legislative structure and approach China should embrace in practice in order to build more comprehensive legislation on emission permitting. It is argued that a set of ad hoc legislative measures should be implemented so as to strengthen China's environmental protection and efficiently tackle pollution. The book will be a valuable resource for researchers, academics, and policy makers working in the areas of international environmental law and comparative law.

Sections I and II focus on the experience gained from the erosion hotspots in the Chinese Loess Plateau whereas Section III expands the scope to other regions with different functions for check dams including headwater ecosystems and alpine environments. Sample topics covered in Check Dam Construction for Sustainable Watershed Management and Planning include The regulating effect of check dam systems on sediment redistribution and the formation and development of dam systems in small watersheds. Water and soil conservation made possible by check dam construction and sediment source analysis of water sediment retarding effects of check dams. The regulation of check dam systems on the erosion dynamic process and the mechanism of erosion reduction by check dams. Flood control risk assessment on warping dam systems and the development and utilization model of check dam systems. With its systematic coverage of all aspects of dam construction and maintenance Check Dam Construction for Sustainable Watershed Management and Planning supports decision making by local authorities and can also be used as a professional guide for ecologists, hydrologists and water resource managers. *China Environment and Development Review* Xiao Zhang, 2016. This book focuses on China's role in international trade along with the country's environmental concerns by investigating the impact of globalization on sustainable development. Climate change has placed the world under a new dilemma and commercial rationality that dominates the world cannot resolve such a dilemma. Therefore greater wisdom is desperately needed such as establishing new civilized norms and value system. The relationship between trade and poverty is discussed in the book and due to the further effects of globalization around the world both environment and natural resource usage are analyzed.
