Chinas Search For Security:

China's Search for Security Andrew J. Nathan, Andrew Scobell, 2015-02-10 Despite its impressive size and population economic vitality and drive to upgrade its military China remains a vulnerable nation surrounded by powerful rivals and potential foes Understanding China's foreign policy means fully appreciating these geostrategic challenges which persist even as the country gains increasing influence over its neighbors Andrew J Nathan and Andrew Scobell analyze China's security concerns on four fronts at home with its immediate neighbors in surrounding regional systems and in the world beyond Asia By illuminating the issues driving Chinese policy they offer a new perspective on the country's rise and a strategy for balancing Chinese and American interests in Asia Though rooted in the present Nathan and Scobell's study makes ample use of the past reaching back into history to illuminate the people and institutions shaping Chinese strategy today They also examine Chinese views of the United States explain why China is so concerned about Japan and uncover China's interests in such problematic countries as North Korea Iran and the Sudan The authors probe recent troubles in Tibet and Xinjiang and explore their links to forces beyond China's borders They consider the tactics deployed by mainland China and Taiwan as Taiwan seeks to maintain autonomy in the face of Chinese advances toward unification They evaluate the strengths and weaknesses of China's three main power resources economic power military power and soft power The authors conclude with recommendations for the United States as it seeks to manage China's rise Chinese policymakers understand that their nation's prosperity stability and security depend on cooperation with the United States If handled wisely the authors believe relations between the two countries can produce mutually beneficial outcomes for both Asia and the world

The Great Wall and the Empty Fortress Andrew J. Nathan, Robert S. Ross, 1998 Many see China and the United States on the path to confrontation The Chinese leadership violates human rights norms It maintains a harsh rule in Tibet spars aggressively with Taiwan and is clamping down on Hong Kong A rising power with enormous assets China increasingly considers American interests an obstacle to its own But the authors argue the United States is the least of China's problems Despite its sheer size economic vitality and drive to upgrade its military forces China remains a vulnerable power crowded on all sides by powerful rivals and potential foes As it has throughout its history China faces immense security challenges and their sources are at and within China's own borders China's foreign policy is calibrated to defend its territorial integrity against antagonists who are numerous near and strong The authors trace the implications of this central point for China's relations with the United States and the rest of the world

China's Search for Energy Security Suisheng Zhao, 2014-06-11 China's rapid economic growth in the recent decades has produced an unprecedented energy vulnerability that could threaten the sustainability of its economic development a linchpin to social stability and ultimately the regime legitimacy of the Chinese Communist Party CCP as well as the foundation for China's rising power aspirations What is the Chinese perception of the energy security and challenges how has the Chinese government responded to the challenges

What are the international implications of China's search for energy security? This collection of contributions by leading scholars seeks answers to these extremely important questions. The book is divided into three parts: Part I presents an overview of China's sense of energy security and its strategic responses; Part II examines China's energy policy making processes, the efforts to reform and reorganize the energy sector and reset policy priorities; Part III focuses on the international implications of China's search for energy security. This book consists of articles published in the *Journal of Contemporary China*.

Future Oil Demands of China, India, and Japan George G. Eberling, 2014-07-02

Future Oil Demands of China, India and Japan examines how Chinese oil energy will likely shape future Sino-Indian and Sino-Japanese relations under conditions of dependency and non-dependency and whether competition or cooperation for scarce energy resources will result. The author lists and describes three possible Chinese oil energy futures or scenarios: Competitive Dependency, Competitive Surplus and Cooperative Surplus using Scenario Analysis and the PRINCE Method to subsequently estimate their associated likelihoods. Further, this book discusses and evaluates their strategic implications for India and Japan and estimates the most likely oil energy future. This book argues that China's rising dependence on imported oil, along with its adroit use of soft power, economic prowess, strategic engagement of the world as an alternative model of political and economic development, military modernization and rapid economic growth can only mean that it will alter the global status quo and become the dominant actor in world affairs in the near future. India and Japan will be less influential economically because China is skillfully harnessing and strategically exercising the elements of national power: diplomatic, informational, military and economic to acquire scarce oil energy resources in the Near East, Western Hemisphere and Sub-Saharan Africa.

Southeast Asia and the Rise of China Ian Storey, 2013-08-21 Since the early 1990s and the end of the Cold War, the implications of China's rising power have come to dominate the security agenda of the Asia-Pacific region. This book is the first to comprehensively chart the development of Southeast Asia's relations with the People's Republic of China (PRC) from 1949 to 2010, detailing each of the eleven countries' ties to the PRC and showing how strategic concerns associated with China's regional posture have been a significant factor in shaping their foreign and defence policies. In addition to assessing bilateral ties, the book also examines the institutionalization of relations between the Association of Southeast Asian Nations (ASEAN) and China. The first part of the book covers the period 1949-2010; it examines Southeast Asian responses to the PRC in the context of the ideological and geopolitical rivalry of the Cold War. Southeast Asian countries' policies towards the PRC in the first decade of the post-Cold War era and deepening ties between the ASEAN states and the PRC in the first decade of the

twenty first century Part Two analyses the evolving relationships between the countries of mainland Southeast Asia Vietnam Thailand Myanmar Laos and Cambodia and China Part Three reviews ties between the states of maritime Southeast Asia Indonesia Malaysia Singapore the Philippines Brunei and East Timor and the PRC Whilst the primary focus of the book is the security dimension of Southeast Asia China relations it also takes full account of political relations and the burgeoning economic ties between the two sides This book is a timely contribution to the literature on the fast changing geopolitics of the Asia Pacific region

China's Growing Military Power Andrew Scobell,Larry M. Wortzel,2014-07-09

The tenor of U S China relations for much of the first year of the administration of President George W Bush was set by a crisis that need not have occurred How the situation was handled and eventually resolved is instructive It tells us about a beleaguered communist leadership in the buildup to major generational transition scheduled for late 2002 and early 2003 and the mettle of a democratically elected U S government tested early in its tenure by a series of foreign policy crises and a carefully coordinated set of devastating terrorist strikes against the continental United States The way the April 2001 crisis on Hainan Island was resolved must be chalked up as a success for the United States the key was Washington s ability to convince Beijing that holding the air crew was hurting and not advancing Chinese interests

Chinese National Security Andrew Scobell,Larry M. Wortzel,2005

This volume represents the fruits of a conference held at the U S Army War College in September 2005 on the theme of Chinese Crisis Management One of the major debates that emerged among participants was whether all the case studies under examination constituted crises in the eyes of China s leaders The consensus was that not all of those incidents were perceived as crises As a result the rubric of decision making under stress was adopted as

presenters revised their papers for publication
