Chemistry and Numbers Steve Monas, 2006-11-22 Chemistry and Numbers is the definitive guide to Online Dating and Relationship sites. This book reviews some of the most popular and successful online dating sites helping you make an informed decision. A step by step fully illustrated guide on signing up to making the first impression. Your True Love Is Just A Click Away. You are living in California and your soulmate lives in Nebraska. Do you believe that you'll meet them at the corner bar? The dating scene is changing every day and online dating websites have opened up singles to a whole new world of dating opportunities. Never before has true love been found from around the corner to half a world away. As you are reading this millions of eligible men and women are online looking for their Mr or Mrs Right but with so many online dating sites and choices it can be very hard to find the right one for you. Some of the 20 sites that are reviewed and shown with Step by Step Picture Instructions include Match, eHarmony, True Chemistry, American Singles, Lava Life, Craigslist, and more. Why Did You Create An Online Dating Profile? I created an online dating profile to meet new people and to jump start my dating life. I moved to a new city after college and prior to posting online I struggled to find men that I was interested in dating. As is the case for many young professionals there's scant opportunity to meet the right person unless you have a vast social network so my profile was meant to expand my search wider and include people I wouldn't meet in my everyday travels between work at a very small company, the gym and my grad school classes. The internet provided an efficient convenient way. Also view BestInternetDatingStories.com
