Let's Do the Numbers

Ian Sender, 2014-10-16 Spend 80 000 or 20 000 a year In my experience clients most satisfied with their retirement income were those that did the numbers themselves They created the income level they enjoyed in retirement by working the numbers backward to determine how much to save and invest After estimating their Social Security and pension benefits they decided they wanted 40 000 a year from investments They knew that inflation will reduce their retirement dollar to fifty cents over time That meant that they needed a nest egg of over 1 million in order to take 80 000 in future dollars 40 000 current Since retirement plans pensions and IRAs allow money to compound WITHOUT taxes now they used them at work and on their own Younger clients have used Roth IRAs since it allows them to completely avoid income taxes on that money in time I showed these clients how to use a calculator to find the <http://www.moneychimp.com/calculator>
