

Uniclic® Installation Guide

General:

We recommend installation be carried out by a professional flooring installer.

Uniclic® is a revolutionary system for installing laminate floors without using glue. The panels can be clicked together simply thanks to the ingenious shape of the tongue and groove. Uniclic® is unique because you can install the planks in two different ways:

Method A: Position the panel to be installed at an angle of 20 to 30° to the panel already installed. Move the panel gently up and down and at the same time exert forward pressure. The panels will automatically click into place. You can either insert the tongue into the groove, or the groove onto the tongue. The tongue in groove method is the most common and easiest way.

See diagram 1A - 1B - 1C.

Method B: With Uniclic® you can also tap the panels into each other without glue. For this method you must use a tapping block. The planks should not be joined with a single tap. To avoid damaging the panels you must tap them together gradually.

See diagram 2A - 2B.
