Meyer, 2023-12-11 This unique volume presents an edited selection of works upon the laws of armed conflict by the late Professor Colonel G I A D Draper OBE Professor Colonel Draper was a central figure in the analysis and dissemination of the humanitarian laws of armed conflict in the English speaking world He had a wide practical and academic experience of the subject including service as a prosecutor at the Nuremberg trials His work covered not only the contemporary substance of the law but also its moral ethical and political context the pressures upon its development and its potential for further positive and other development This edited collection presents a very significant part of Professor Colonel Draper s work including many pieces which are no longer readily accessible or have never before been published with modern commentary referring to developments which have occurred since his death The late Professor Colonel s work is an important scholarly contribution to the subject and also retains a very great degree of modern relevance including comment upon such issues as war crimes and appropriate responses to them The Editors present this collection as both an important scholarly and practical resource and a fitting tribute to one of the great twentieth century contributors to this area of law *Rubens and the Eloquence of Drawing* Catherine H. Lusheck, 2017-08-07 Rubens and the Eloquence of Drawing re examines the early graphic practice of the preeminent northern Baroque painter Peter Paul Rubens Flemish 1577 1640 in light of early modern traditions of eloquence particularly as promoted in the late sixteenth and early seventeenth century Flemish Neostoic circles of philologist Justus Lipsius 1547 1606 Focusing on the roles that rhetorical and pedagogical considerations played in the artist s approach to disegno during and following his formative Roman period 1600 08 this volume highlights Rubens s high ambitions for the intimate medium of drawing as a primary site for generating meaningful and original ideas for his larger artistic enterprise As in the Lipsian realm of writing personal letters the humanist activity then described as a cognate activity to the practice of drawing a Senecan approach to eclecticism a commitment to emulation and an Aristotelian concern for joining form to content all played important roles Two chapter long studies of individual

drawings serve to demonstrate the relevance of these interdisciplinary rhetorical concerns to Rubens's early practice of drawing. Focusing on Rubens's *Medea Fleeing with Her Dead Children* (Los Angeles Getty Museum) and *Kneeling Man* (Rotterdam Museum Boijmans Van Beuningen), these close looking case studies demonstrate Rubens's commitments to creating new models of eloquent drawing and to highlighting his own status as an inimitable maker. Demonstrating the force and quality of Rubens's intellect in the medium then most associated with the closest ideas of the artist, such designs were arguably created as more robust pedagogical and preparatory models that could help strengthen art itself for a new and often troubled age.

Miles, 1995-02-06

For those interested in finding a computer application well suited for their own qualitative research or just learning more about the capabilities of the latest generation of computer software designed with text, *Computer Programs for Qualitative Data Analysis* by Eben A. Weitzman and Matthew B. Miles probably represents the single investment they can make. In *Computer Programs for Qualitative Data Analysis*, Weitzman and Miles provide a critical in-depth look at 24 separate applications. The authors make an impressive team: Weitzman is a professor of social and organizational psychology with an extensive computer background, and Miles is a social psychologist who is well known in the field of qualitative research for co-authoring a popular book on qualitative data analysis with A. Michael Huberman. Together, the two researchers have produced an informative, user-friendly sourcebook that can save readers a significant amount of time and money when shopping for a software program for qualitative data analysis. Weitzman and Miles clearly put a tremendous amount of work into *Computer Programs for Qualitative Data Analysis*; they write their reviews of each application in remarkably lucid and jargon-free language in a format reminiscent of Consumer Reports. The level of detail in the reviews reflects their careful and thoughtful field testing of 24 software programs. Reviews average about 10 pages each and actually show you what each application can do, and every review includes a series of realistic visuals complete with helpful captions that display what the computer screen looks like when performing various functions with that specific computer program. In addition to describing the special features of each computer program, Weitzman and Miles discuss the strengths and weaknesses of every application and make explicit comparisons with other applications in the same family. Sage Publications deserves special credit for their role in publishing *Computer Programs for Qualitative Data Analysis*. Instead of issuing this book in hardcover and attaching a hefty price tag, they released it as an oversized 8 1/2 by 11 inch paperback and made this valuable information available at a modest cost. *Computer Programs for Qualitative Data Analysis* is the most comprehensive resource on its subject currently.
