Handbook of Research on Technical, Privacy, and Security Challenges in a Modern World Tyagi, Amit Kumar, 2022-06-30

More individuals than ever are utilizing internet technologies to work from home, teach and learn, shop, interact with peers, review medical records, and more. While it is certainly convenient to conduct such tasks via the internet, this increased internet presence has also led to a rise in the search and availability of personal information, which in turn is resulting in more cyber attacks, privacy breaches, and information leaks. Cyber criminals are using such opportunities to attack governments, organizations, and individuals, making it necessary to anticipate, assess, and mitigate privacy and security threats during this infodemic.

The **Handbook of Research on Technical, Privacy, and Security Challenges in a Modern World** provides a comprehensive overview of the latest research and best practices in these areas. The book covers a wide range of topics, including:

- Technical Challenges:** Discusses the challenges of maintaining system security, protecting data privacy, and ensuring the integrity of information in the digital space.
- Privacy Challenges:** Examines the ethical and legal issues surrounding the collection, use, and disclosure of personal data.
- Security Challenges:** Analyzes the risks and threats to digital systems and networks, and explores strategies for mitigating these risks.

The book is a valuable resource for researchers, practitioners, and students in the fields of computer science, information systems, and cybersecurity. It provides a wealth of information and insights into the complex challenges of maintaining security and privacy in the modern digital world.

on Technical Privacy and Security Challenges in a Modern World discusses the design and development of different machine learning systems including next generation applications in order to mitigate cyber attacks and address security challenges in everyday technologies. It further explores select methods and algorithms of learning for implementing better security methods in fields such as business and healthcare. It recognizes the future of privacy and the importance of preserving data through recommended practice feedback loops and smart agents. Covering topics such as face mask detection, gesture recognition and botnet attacks and detection, this major reference work is a dynamic resource for medical professionals, healthcare administrators, government officials, business executives and managers, IT managers, students and faculty of higher education, librarians, researchers and academicians.
