Blueprints for Text Analytics Using Python Jens Albrecht, Sidharth Ramachandran, Christian Winkler, 2020-12-04

Turning text into valuable information is essential for businesses looking to gain a competitive advantage. With recent improvements in natural language processing (NLP), users now have many options for solving complex challenges. But it's not always clear which NLP tools or libraries would work for a business's needs or which techniques you should use and in what order. This practical book provides data scientists and developers with blueprints for best practice solutions to common tasks in text analytics and natural language processing. Authors Jens Albrecht, Sidharth Ramachandran, and Christian Winkler provide real world case studies and detailed code examples in Python to help you get started quickly. Extract data from APIs and web pages. Prepare textual data for statistical analysis and machine learning. Use machine learning for classification, topic modeling, and summarization. Explain AI models and classification results. Explore and visualize semantic similarities with word embeddings. Identify customer sentiment in product reviews. Create a knowledge graph based on named entities and their relations.

AI Blueprints Dr. Joshua Eckroth, 2018-12-31. The essential blueprints and workflow you need to build successful AI business applications. Key Features: Learn and master the essential blueprints to program AI for real world business applications. Gain insights into how modern AI and machine learning solve core business challenges. Acquire practical techniques and a workflow that can build AI applications using state of the art software libraries. Work with a practical code based strategy for creating successful AI solutions in your business. Book Description: AI Blueprints gives you a working framework and the techniques to build your own successful AI business applications. You'll learn across six business scenarios how AI can solve critical challenges with state of the art AI software libraries and a well thought out workflow. Along the way you'll discover the practical techniques to build AI business applications from first design to full coding and deployment. The AI blueprints in this book solve key business scenarios. The first blueprint uses AI to find solutions for building plans for cloud computing that are on time and under budget. The second blueprint involves an AI system that continuously monitors social media to gauge public feeling about a topic of interest such as self driving cars. You'll learn how to approach AI business problems and apply blueprints that can ensure success. The next AI scenario shows you how to approach the problem of creating a recommendation engine and monitoring how those recommendations perform. The fourth blueprint shows you how to use deep learning to find your business logo in social media photos and assess how people interact with your products. Learn the practical techniques involved and how to apply these blueprints intelligently. The fifth blueprint is about how to best design a trending now section on your website much like the one we know from Twitter. The sixth blueprint shows how to create helpful chatbots so that an AI system can understand customers questions and answer them with relevant responses. This book continuously demonstrates a working framework and strategy for building AI business applications. Along the way you'll also learn how to prepare for future advances in AI. You'll gain a workflow and a
