*Controlling Immigration* Wayne A. Cornelius, Philip L. Martin, James Frank Hollifield, 1994 This text is a systematic comparative multidisciplinary study of immigration policy and policy outcomes in nine industrialized democracies the United States Canada Great Britain France Germany Belgium Italy Spain and Japan It has two central theses The first the convergence hypothesis is that there is a growing similarity in immigration policy results and public reaction within these nine countries The second thesis the gap hypothesis argues that the gap between the goals of immigration policy and its outcomes is wide and growing wider Beyond testing these hypotheses against new evidence the book seeks to explain the declining effectiveness of immigration control measures in today's labour importing democracies In each of the country profiles the author explains why certain measures were chosen and why they usually failed to achieve their stated objectives

**Canadian Liberalism and the Politics of Border Control, 1867-1967** Christopher G. Anderson, 2012-11-17 Since 9 11 Canada's reputation as an inclusive country that takes in immigrants and refugees has been clouded by restrictive immigration policies increased interdiction and the detention of

asylum seekers Moreover public debate over the arrival of non citizens especially those seeking entry through unofficial channels is now often framed within a security discourse that is used to justify a more restrictive approach These developments are not surprising in the current context but as Anderson illustrates they are also nothing new Canadian Liberalism and the Politics of Border Control sheds light on the long and complex history of Canada's efforts to control its borders Framing pivotal moments within a long standing but often overlooked debate over the rights of non citizens Anderson demonstrates that today's more restrictive approach reflects traditions deeply embedded within liberal democracies His insights into Canadian immigration and refugee history offer valuable lessons for understanding the nature of contemporary liberal democratic control policies *Modes of Migration Regulation and Control in Europe* Jeroen Doomernik, Michael Jandl, 2025-10-01 In Europe immigration is a politically burning issue especially when it comes to the arrival of asylum seekers and illegal labour migrants Governments want to keep them under control in order to limit their numbers Yet traditionally there were strong differences between European states in the extent to which they sought to do so and the instruments employed to that end Currently the contours become visible of a common approach towards notably irregular migration This becomes clear from the country studies comprising this volume **Opening and Closing the Doors** Frank D. Bean, Georges Vernez, Charles B.
