**Semantic Web Technologies and Social Searching for Librarians** Robin M. Fay,Michael Sauers,2012 There are trillions of bytes of information within the web all of it driven by behind the scenes data Vast quantities of information make it hard to find what s really important

Here s a practical guide to the future of web based technology especially search It provides the knowledge and skills necessary to implement semantic web technology You ll learn how to start and track trends using social media find hidden content online and search for reusable online content crucial skills for those looking to be better searchers The authors explain how to explore data and statistics through WolframAlpha create searchable metadata in Flickr and give meaning to data and information on the web with Google s Rich Snippets Let Robin M Fay and Michael P Sauers show you how to use tools that will awe your users with your new searching skills

**Custodians of the Internet** Tarleton Gillespie,2018-01-01 Most users want their Twitter feed Facebook page and YouTube comments to be free of harassment and porn Whether faced with fake news or livestreamed violence content moderators who censor or promote user posted content have never been more important This is especially true when the tools that social media platforms use to curb trolling ban hate speech and censor pornography can also silence the speech you need to hear The author provides an overview of current social media

practices and explains the underlying rationales for how when and why these policies are enforced In doing so the author highlights that content moderation receives too little public scrutiny even as it shapes social norms and creates consequences for public discourse cultural production and the fabric of society Based on interviews with content moderators creators and consumers this book is for anyone who s ever clicked like or retweet
