Viral Hit Post Apocalyptic Story:

American Cities in Post-Apocalyptic Science Fiction Robert Yeates, 2021-11-15 Visions of the American city in post apocalyptic ruin permeate literary and popular fiction across print visual audio and digital media American Cities in Post Apocalyptic Science Fiction explores the prevalence of these representations in American culture drawing from a wide range of primary and critical works from the early twentieth century to today Beginning with science fiction in literary magazines before taking in radio dramas film video games and expansive transmedia franchises Robert Yeates argues that post apocalyptic representations of the American city are uniquely suited for explorations of contemporary urban issues Examining how the post apocalyptic American city has been repeatedly adapted and repurposed to new and developing media over the last century this book reveals that the content and form of such texts work together to create vivid and immersive fictional spaces in ways that would otherwise not be possible Chapters present media specific analyses of these texts situating them within their historical contexts and the broader history of representations of urban ruins in American fiction Original in its scope and cross media approach American Cities in Post Apocalyptic Science Fiction both illuminates little studied texts and provides provocative new readings of familiar works such as Blade Runner and The Walking Dead placing them within the larger historical context of imaginings of the American city in ruins **Challenging**

Anthropocentrism in Eco-Science Fiction Novels Fatma Gamze Erkan, 2024-01-03 This book explores the relationship between humanity and nature while challenging the notion that anthropocentric behaviour causes the environmental catastrophes depicted in the four selected British eco science fiction novels These novels are John Christopher s The Death of Grass 1956 J G Ballard s The Drought 1965 Brian Aldiss s Earthworks 1965 and John Brunner s The Sheep Look Up 1972 all of which fictionalise the fact that the consequences of environmental problems can be diverse but equally serious This book examines how even the smallest damage caused by human beings to the environment negatively affects them other living beings and the ecosystem they need to live and flourish In conjunction with these the factors and conditions that push characters in the novels to ignore and harm the environment are also scrutinised While examining how and why the environmental problems in the novels have arisen it is evaluated whether the authors propose solutions to these problems and if so what they are **Making Eden** David Beerling, 2019-01-31 Over 7 billion people depend on plants for healthy productive secure lives but few of us stop to consider the origin of the plant kingdom that turned the world green and made our lives possible And as the human population continues to escalate our survival depends on how we treat the plant kingdom and the soils that sustain it Understanding the evolutionary history of our land floras the story of how plant life emerged from water and conquered the continents to dominate the planet is fundamental to our own existence In Making Eden David Beerling reveals the hidden history of Earth s sun shot greenery and considers its future prospects as we farm the planet to feed the world Describing the early plant pioneers and their close symbiotic relationship with fungi he examines the central

role plants play in both ecosystems and the regulation of climate As threats to plant biodiversity mount today Beerling discusses the resultant implications for food security and climate change and how these can be avoided Drawing on the latest exciting scientific findings including Beerling s own field work in the UK North America and New Zealand and his experimental research programmes over the past decade this is an exciting new take on how plants greened the continents
