The Nature of Human Creativity brings together an incredible diversity of viewpoints helping students and researchers to see the points of consensus as well as the differences in contemporary perspectives Defining Creativity and Its Role in Marx's Philosophy Carlos Avila,2023 The intent of this thesis is to explore the concept of creativity as it appears in the major works of Karl Marx and to attempt to discern its role in the emancipatory political project that Marx proposes Contemporary understandings of creativity still rely upon notions of the artist genius locating the true expression of creative freedom in the work of art A more recent development is the commodification of creativity as a quality of a good worker who is now expected to find innovative ways of doing their job more efficiently Both of these ideas about creativity allow for our creative energies to be diverted towards maintaining the existing relations of capitalist labor one by putting it out of reach for most the other by making it part of the tedium of wage labor This thesis argues that creativity as a fundamental human capacity is an essential tool in changing our existing circumstances by instigating radical breaks from the status quo Therefore the first step in an emancipatory politics today is redefining creativity **Journal of Legal Education** ,1971 Re-Defining Creativity Within the Creative Industries Discourse Andrew Barnum,2012-06-01 Starting from a practitioner s standpoint this study investigates Creativity as a system in which individual talent desire and ambition operate In the context of sustaining these motivations personally and commercially Andrew Barnum examines the Creative Industries discourse as an organising principle and an historical evolution of a system named to provide relevant frameworks and guidelines for the future sustenance of practitioners and patrons This thesis has arisen from an investigation into the changed conditions outlined within the Creative Industries discourse an argument for a potential re definition of Creativity that better fits the conditions generated by the emerging knowledge economy The study is viewed through the lens of Barnum s thirty three years of practice as an Artist Designer and Musician The study considers the intrinsic struggle of free individuals to sustain their passion to generate deeper meaning within an industrialised system of livelihood initially created through a government policy initiative The aim is to explain the individual practitioners relationship to a system that contains numerous and complex tensions *The Creative Process in Human Resource Professionals* Richard David Brynteson,1997 **Psychology. Sielkunde** ,1992 *Corporate Entrepreneurship* Michael H. Morris,Donald F.
