Crash Course in Technology Planning Christopher D. Brown, 2016-07-18 This easy to use primer will empower anyone even those with no IT background to face the challenge of adding one or more technologies to library services or maintaining existing technologies. Crash Course in Technology Planning addresses a wide variety of IT topics in the library sphere providing information in a logical manner and order. It begins with an explanation of triaging existing IT issues then moves into diagnosing and repairing both individual PCs as well as the library Local Area Network LAN. The following chapters cover other important topics such as the best way to inventory computers and equipment how to budget for and procure new equipment and recommended ways for an IT layperson to set and achieve goals.
