The author presents theoretical and experimental evidence and recommends the practical applications to classroom and clinic settings of current theory and research, describes and analyzes methods of instruction, and provides direction in the administration of diagnostic tests and the interpretation of test achievement. Theories are described and restated as they are relevant to instruction, assessment, and evaluation. The goal is to enable educators and psychologists to effectively and efficiently assist students and clients to achieve competency in literacy and academic tasks and to introduce physicians to the cognitive and affective components of schooling. This comprehensive book was written to serve as a text in graduate courses in psychology, diagnosis, and remediation of reading and writing difficulties, as well as for practical use in neuropsychological aspects of reading and learning disabilities and psychoeducational evaluation of learning problems.      **Resources in education**, 1987-02
