## Defining Digital Humanities A Reader:

Defining Digital Humanities Melissa M. Terras, Julianne Nyhan, Edward Vanhoutte, 2013 This reader brings together the essential readings that have emerged in Digital Humanities. It provides a historical overview of how the term Humanities Computing developed into the term Digital Humanities and highlights core readings which explore the meaning, scope and implementation of the field. To contextualize and frame each included reading the editors and authors provide a commentary on the original piece. There is also an annotated bibliography of other material not included in the text to provide an essential list of reading in the discipline.

**Computation and the Humanities** Julianne Nyhan, Andrew Flinn, 2016-11-23 This book addresses the application of computing to cultural heritage and the discipline of Digital Humanities that formed around it. Digital Humanities research is transforming how the Human record can be transmitted, shaped, understood, questioned and imagined and it has been ongoing for more than 70 years. However, we have no comprehensive histories of its research trajectory or its disciplinary development. The authors make a first contribution towards remedying this by uncovering, documenting and analysing a number of the social, intellectual and creative processes that helped to shape this research from the 1950s until the present day. By taking an oral history approach this book explores questions like among others researchers' earliest memories of encountering computers and the factors that subsequently prompted them to use the computer in Humanities research. Computation and the Humanities will be an essential read for cultural and computing historians, digital humanists and those interested in developments like the digitisation of cultural heritage and artefacts. The Companion to Digital Humanities in Practice Constance Crompton, Laura Estill, Richard J. Lane, Ray Siemens, 2025-11-21 The Companion to Digital Humanities in Practice offers international perspectives on how we teach and research in and with digital humanities today. Building on the foundation of earlier publications that focused on practice in the field, this Companion provides a significant treatment of pertinent issues and contexts, extending breadth and depth as well as reach in terms of geographical diversity of topics and contributors. Divided into four sections, each with a high level practice oriented focus, the volume covers data tools and techniques, communication, dissemination and engagement, and pedagogical practices. Contributors to the volume include both established and emerging scholars. Foregrounding and critically reviewing the emergence and development of standards based communities of practice, the Companion provides an overview of core competencies, conceptualized case studies and links to further reading, training materials and exercises. The Companion to Digital Humanities in Practice will appeal to academics, researchers and postgraduate students working in DH, literary studies, history and the humanities more broadly. It should also be of interest to professionals working in DH and galleries, libraries, archives and museums.

*The Emergence of the Digital Humanities* Steven E. Jones,2013-08-15 The past decade has seen a profound shift in our collective understanding of the digital network What was once understood to be a transcendent virtual reality is now experienced as a ubiquitous grid of data that we move through and interact with every day raising new questions about the social locative embodied and object oriented nature of our experience in the networked world In The Emergence of the Digital Humanities Steven E Jones examines this shift in our relationship to digital technology and the ways that it has affected humanities scholarship and the academy more broadly Based on the premise that the network is now everywhere rather than merely out there Jones links together seemingly disparate cultural events the essential features of popular social media the rise of motion control gaming and mobile platforms the controversy over the gamification of everyday life the spatial turn fabrication and 3D printing and electronic publishing and argues that cultural responses to changes in technology provide an essential context for understanding the emergence of the digital humanities as a new field of study in this millennium The Open Access version of this book available at <https://doi.org/10.4324/9780203093085> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
