

# DP-4 & DAYC-2 Scoring Guide

This document was developed by the CESA 5 REsource Professional Development team to address scoring questions related to the two-supported eligibility evaluation tools for the Wisconsin Birth to 3 Program. There are some key differences in how the DAYC-2 and DP-4 are scored. If you are familiar with one assessment and are trying another, please note these differences in order to get accurate results. You can use this document to check your understanding of scoring, so we suggest (1) reviewing the following chart, (2) reviewing the manual, and (3) looking through the following scoring pages. You can add the domain/subdomain, then check that your total matches the final raw score listed. The following information was gathered via the publisher manual and via email communication with the publisher.

## Comparison Chart: DP-4 and DAYC-2

DEVELOPMENTAL PROFILE 4 (DP-4)	DEVELOPMENTAL ASSESSMENT OF YOUNG CHILDREN 2 <sup>nd</sup> ED. (DAYC-2)
<b>Administration</b>	
"All respondents should have frequent, recent, and prolonged contact with the child. The respondent should have at least one month's experience with the child" (Alpern, 2020, p. 7). "The Parent/Caregiver Interview form is designed to be completed through an in-person interview" (Alpern, 2020, p. 8).	The scores for items can be based on any one or all of (1) observation (2) interview (3) direct assessment (Vorell & Maddox, 2013, p. 5).
<b>Entry Point</b>	
"Each DP-4 scale has four age-based start items, clearly labeled on the Parent/Caregiver Interview Form" (Alpern, 2020, p. 8).	"The entry point for each domain is determined by the child's chronological age and will vary from domain to domain" (Vorell & Maddox, 2013, p. 7).
<b>Scoring Rules</b>	
The Start/Stop Rule applies to the Parent/Caregiver Interview Form and Clinician Rating Form.	<b>Basal</b> "The basal is established when the child receives a score of 1 on three items in a row. The examiner begins testing with the entry point item. If the child does not score 1 on each of the first three items administered- that is, if the child received a 0 on any of the first three items administered starting from the entry point- the examiner should test backward until the child scores 1 on three items in a row. This is the basal. All items below the basal are scored 1" (Vorell & Maddox, 2013, p. 7). <b>Ceiling</b> "A ceiling occurs when three consecutive items receive a score of 0. If the child did not receive a 0 on three items in succession during establishment of a basal, return to the highest item number scored and continue testing until a ceiling is established. The true ceiling is the set of three items scored 0 that is closest to the basal" (Vorell & Maddox, 2013, p. 7-8).
