[Building Interactive Data Visualizations with D3.js](#) Alex Simoes, 2015 D3 js is a JavaScript library that enables data to drive interactive graphical forms and makes complex data analysis easier Nowadays big data data deluge and analytics are all trending buzzwords so how does D3 js make sense of all this data Simply by using visualizations and defining rules for dynamic graphics engines which allows users to gain rich insights from large and complex datasets Building Interactive Data Visualization with D3 js showcases the D3 JavaScript library built specifically for the use of driving visual elements with data This video course will walk you through the basics of the library by showing its core components and methodologies By following along with the examples in this video you ll become proficient at creating dynamic visualizations driven by user interactivity This course starts with the very basics of frontend web development showing the challenges of incorporating dynamic graphics without using D3 Users learn to combine data with visual elements on the page to create informative visualizations By the end of this section viewers will be comfortable with using the D3 library to create their own custom concept of data driven visualizations We ll see how to use real datasets via APIs to create custom visualizations By leveraging the interactive nature of web programming we ll look at how to incorporate user input to add interactivity to our visualization We ll start with basic scatter plots and slowly build

upon this foundation to create more complicated forms of dynamic data visualizations Eventually we'll end the video course by walking through the process of creating a completely novel form of visualization merging concepts of both a scatter plot and a geographic map Building Interactive Data Visualization with D3.js provides one with the foundation to continue on their journey of creating novel and highly impactful data visualizations Resource description page [D3.js in Action, Third Edition](#) Elijah Meeks, Anne-Marie Dufour, 2024-07-30 D3.js in Action Third Edition teaches you how to create an extensive portfolio of visualizations interactive graphics and data driven applications using D3.js This third edition is fully updated to the latest version of D3 It also contains new coverage of the essential aspects of modern digital visualizations **D3.js Quick Start Guide** Matthew Huntington, 2018-09-27 This book will help you build interactive graphs that are viewable in any web browser using JavaScript D3.js and SVG You will learn how to make a scatter plot a bar graph a pie chart a force directed graph and a map Key Features Takes you through the most common graphs you'll need Add interactivity to your visualizations Easy to follow builds Book Description D3.js is a JavaScript library that allows you to create graphs and data visualizations in the browser with HTML SVG and CSS This book will take you from the basics of D3.js so that you can create your own interactive visualizations to creating the most common graphs that you will encounter as a developer scientist statistician or data scientist The book begins with an overview of SVG the basis for creating two dimensional graphics in the browser Once the reader has a firm understanding of SVG we will tackle the basics of how to use D3.js to connect data to our SVG elements We will start with a scatter plot that maps run data to circles on a graph and expand our scatter plot to make it interactive You will see how you can easily allow the users of your graph to create edit and delete run data by simply dragging and clicking the graph Next we will explore creating a bar graph using external data from a mock API After that we will explore animations and motion with a bar graph and use various physics based forces to create a force directed graph Finally we will look at how to use GeoJSON data to create a map What you will learn Build a scatter plot Build a bar graph Build a pie chart Build a force directed graph Build a map Build interactivity into your graphs Who this book is for This book is for web developers interactive news developers data scientists and anyone interested in representing data through interactive visualizations on the Web with D3 Some basic knowledge of JavaScript is expected but no prior experience with data visualization or D3 is required to follow this book *Interactive Data Visualization for the Web* Scott Murray, 2017-08-03 Author Scott Murray teaches you the fundamental concepts and methods of D3 a JavaScript library that lets you express data visually in a web browser **Fullstack D3 and Data Visualization** Amelia Wattenberger, 2019-02 Build beautiful data visualizations with D3 The Fullstack D3 book is the complete guide to D3 With dozens of code examples showing each step you can gain new insights into your data by creating visualizations Learn how to quickly turn data into insights with D3 We have the data But it needs to be understood by humans The best way to convert this data into an understandable format is to mold it into a data visualization And D3 is the best tool for job if you need to create custom data

visualizations With Fullstack D3 and Data Visualization you and your team will be able to share key insights uncover problems before they start and impress your boss by creating gorgeous visualizations What s Inside Chapter 0 Introduction When would you want to use D3 js There is a spectrum of libraries to create charts on the web on one end you have easy to use basic libraries that will create a standard chart type Chapter 1 Making your first chart In this chapter we make a line chart Line charts are a great starting place because of their popularity but also because of their simplicity Chapter 2 Making a scatterplot When looking at the relationship between two metrics a scatterplot is a good choice In this chapter we show how to create a scatterplot Chapter 3 Making a bar chart In this chapter we cover how to create a histogram which is a bar chart that shows the distribution of one metric with the metric values on the x axis and the frequency of values on the y axis Chapter 4 Animations and Transitions When we update our charts we can animate elements from their old to their new positions These animations can be visually exciting but more importantly they have functional benefits Chapter 5 Interactions The biggest advantage of creating charts with JavaScript is the ability to respond to user input Chapter 6 Making a map Maps are also uniquely good at answering geography based questions In this chapter we ll build a map and learn how to plot values within a location Chapter 7 Data Visualization Basics Now that we re comfortable with how to create a chart we should zoom out a bit and talk about what chart to create Chapter 8 Common Charts In this chapter we talk about common chart types and when to use them Chapter 9 Dashboard Design A dashboard is any web interface that makes sense out of dynamic data and in this chapter we learn how to make one Chapter 10 Advanced Visualization Marginal Histogram First we ll focus on enhancing a chart we ve already made our scatter plot This chart will have multiple goals all exploring the daily temperature ranges in our weather dataset Chapter 11 Advanced Visualization Radial Weather Chart We talked about radar charts in Chapter 10 For this project we ll build a more complex radar chart Chapter 12 Advanced Visualization Animated Sankey Diagram In this project we ll be simulating real data and creating an animated diagram to engage our viewers Chapter 13 D3 and React What s the best way to draw a chart within React It turns out that there is a fair bit of overlap in functionality between a React and D3 we ll discuss how we can create blazing fast charts using the two together Chapter 14 D3 and Angular In this chapter we show how to create optimized SVG charts using D3 and Angular
