

# Refrigerator/Freezer Storage

- Most samples are labeled with storage temp
- Virtually all protein, DNA, and cell samples must be stored at 4°C (refrig) or at -20°C (lab freezer)
  - > Store lyophilized (powdered) protein or DNA samples at -20°C, unless otherwise labeled
  - > Store protein samples alphabetically
  - > Record the date on reagents upon arrival, then record when the sample is first opened
  - > Certain cell lines must be stored at -70°C or below or lose competence or viability
- Do not use defrosting (cycling) refrigerator/freezers
- Repeated freezing/thawing compromises most samples ( aliquot samples on receipt into more usable volumes)
- If possible, have designated refrigerators and freezers for different courses

National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on High School Laboratories: Role and Vision, 2006-01-20 Laboratory experiences as a part of most U S high school science curricula have been taken for granted for decades but they have rarely been carefully examined. What do they contribute to science learning? What can they contribute to science learning? What is the current status of labs in our nation's high schools as a context for learning science? This book looks at a range of questions about how laboratory experiences fit into U S high schools. What is effective laboratory teaching? What does research tell us about learning in high school science labs? How should student learning in laboratory experiences be assessed? Do all student have access to laboratory experiences? What changes need to be made to improve laboratory experiences for high school students? How can school organization contribute to effective laboratory teaching? With increased attention to the U S education system and student outcomes no part of the high school curriculum should escape scrutiny. This timely book investigates factors that influence a high school laboratory experience looking closely at what currently takes place and what the goals of those experiences are and should be. Science educators, school administrators, policy makers and parents will all benefit from a better understanding of the need for laboratory experiences to be an integral part of the science curriculum and how that can be accomplished     **The Science Teacher**, 2007 SCC Library has 1964 cur     Illinois Chemistry Teacher, 2007
