Build up your ability to interpret data that is presented visually. Each of the major standardized tests has increased its emphasis on questions which require you to consistently do three things well: Interpret the wording of the question correctly so you know exactly what information you need to obtain from the data visualization; Interpret the data visualization correctly so you retrieve the correct information from it; Setup the right equations so you can perform the right calculations when applicable on the numbers you retrieved from the data visualization. You will learn to efficiently arrive at the right answer every time. In this book you will find a set of structured but flexible approaches which can be combined in different ways to solve even the hardest questions. Sample questions are asked in a

variety of ways to enhance your ability to work with simple and complex tables charts and graphs Refresher content presented in ways which accelerate your learning and improve your retention of related facts relationships and formulas
