*Data Complexity in Pattern Recognition* Mitra Basu,Tin Kam Ho,2006-12-22 Machines capable of automatic pattern recognition have many fascinating uses in science engineering as well as in our daily lives Algorithms for supervised classification where one infers a decision boundary from a set of training examples are at the core of this capability This book takes a close view of data complexity its role in shaping the theories techniques in different disciplines asks What is missing from current classification techniques When the automatic classifiers are not perfect is it a deficiency of the algorithms by design or is it a difficulty intrinsic to the classification task How do we know whether we have exploited to the fullest extent the knowledge embedded in the training data Unique in its comprehensive coverage multidisciplinary approach from various methodological practical perspectives researchers practitioners will find this book an insightful reference to learn about current available techniques as well as application areas
