management Cathy Colebrook Clothier,AIR FORCE INST OF TECH WRIGHT-PATTERSONAFB OH.,1991 Due to the growing concern over human errors playing an instrumental role in aircraft accidents the Federal Aviation Administration encouraged airlines to develop Cockpit Resource Management CRM training programs to address that issue Baseline data measured crew interaction before pilots were exposed to seminars and simulators Longitudinal data described behavioral changes wrought by the intervention Within airline and within fleet data clearly showed that crews were more effective after CRM training Within airline and across fleet data verified fleet differences discovered by the first method Technology level seemed to be a cause of the fleet differences for crews performing in simulators Crew size affected performance both on the line and in the simulator Finally the across airline and across fleet data in addition to describing fleet differences highlighted differences between the behavioral effectiveness of crews in different airlines   *Cockpit Resource Management Training* Harry W.    Cockpit Resource Management H. Kingsley Povenmire,1989 The concepts of cockpit resource management CRM emerged during a 1979 study by the National Aeronautics and Space Administration which was intended to study the interaction of pilot workload with errors During this study researchers began to realize that the stereo typical airline captain who can do no wrong was not feasible in today s complex jet aircraft Several accidents and incidents may be traced directly to improper crew management or lack of coordination by the crew NASA began to explore the feasibility of teaching generic management principles to flight crews Several training programs have been developed and some significant research has been conducted which further defines optimum CRM training and practice Line Oriented Flight Training LOFT is a training method developed originally to relate simulator training more closely to actual line flying Airlines found that they could enhance the sharing of experiences by simulating an entire flight complete with incidents experienced in the real world rather than repeated malfunctions taken out of context It is important to note that LOFT is often utilized by airlines and other

simulator users without employing the principles of CRM However LOFT is a valuable tool in CRM training This bibliography addresses current training practices techniques which enhance crew coordination and questions appropriate for systematic research kr   Cockpit Resource Management Earl L. Wiener,Barbara G. Kanki,Robert L. Helmreich,1993   **Soaring to Success** Gary L. Sculli,David M.
