Bachelor Thesis from the year 2014 in the subject English Language and Literature Studies Linguistics grade 2 3 University of Cologne Englische Sprache und Literatur I language English abstract The purpose of this paper is to look at the relation between structural and social factors in the formation of CS patterns in bi multilingual communities Furthermore the general applicability of the MLF and the MM to the CS data from different bilingual communities will be explored At the beginning the concept of code switching and its typology will be introduced In section 3 2 the MLF will be presented in order to define morphological and syntactical constraints for CS Then in the frame of the MM possible motivations for CS will be examined These are followed by the perspective on the relation of both models to each other In Chapter 4 using the MLF and the MM CS data from several bilingual communities will be analysed and finally problematic issues in both models will be discussed While monolinguals can vary their utterances by means of changing styles within a language or a dialect through speech rate or intonation bilinguals can do the same in both languages plus they can switch between the languages Thus the speech of bilingual speakers is interesting for research Many researchers have examined this language contact phenomenon and have tried to explain how and why people code switch The study of CS has developed in two main directions structural that is grammatical and sociolinguistic also called pragmatic aspect Originally CS was considered to be the result of poor language competence in both languages Later in the 1970s linguists for example Gumperz 1972 and Pfaff 1979 suggested that mixing between languages does not occur randomly but rather follows certain grammatical rules Many grammatical models have been proposed to account for the grammatical constraints in CS One of the most influential models the Matrix Language Frame Model MLF was introduced by Myers Scotton 1993b The model is based on two asymmetries matrix language vs embedded language and system vs content morphemes However not only structural factors but also social and psychological factors influence the speakers motivation to engage in CS It is one of the biggest challenges in the research on CS to link all these factors to provide a better understanding of the phenomenon of CS Therefore Myers Scotton 1993a went further and developed the Markedness Model MM in an attempt to explain why bilingual speakers code switch and how the social environment influences the type of CS present in the community *Shortcuts in Reasoning (Verbal, Non-Verbal & Analytical) for Competitive Exams with 3 Ebooks* Disha Experts, 2017-08-01 Shortcuts in Reasoning Verbal Non Verbal Analytical with Ebooks is the MOST COST EFFECTIVE QUALITY BOOK ever built for Competitive Exams This book is an
