It deals with the concepts and methodologies required for a computer to perform an intelligent activity. The spectrum of computer science is very wide and it enables the computer to handle almost every activity which human beings could. It deals with defining the basic problem from the viewpoint of solving it through a computer, finding out the total possibilities of solution representing the problem from a computational orientation, selecting data structures, finding the solution through searching the goal in search space, dealing with the real world, uncertain situations, etc. It also develops the techniques for learning and understanding which make the computer able to exhibit an intelligent behavior. The list is exhaustive and is applied now in almost every field of technology. This book presents almost all the components of AI like problem-solving, search techniques, knowledge concepts, expert system, and many more in a very simple language. One of the unique features of this book is inclusion of number of solved examples in between the chapters and also at the end of many chapters. Real-life examples have been discussed to make the reader conversant with the intricate phenomenon of computer science in general and artificial intelligence in particular. The book is primarily developed for undergraduate and postgraduate engineering students. **2062** Toby Walsh, 2018-07-30. A compelling invitation to imagine the future we want. BRIAN CHRISTIAN author of *The Most Human Human*. By 2062 we will have built machines as intelligent as us so the leading artificial intelligence and robotics experts predict. But what will this future look like? In 2062 world-leading researcher Toby Walsh considers the impact AI will have on work, war, economics, politics, everyday life, and even death. Will automation take away most jobs? Will robots become conscious and take over? Will we become immortal machines ourselves, uploading our brains to the cloud? How will politics adjust to the post-truth, post-privacy, digitised world? When we have succeeded in building intelligent machines, how will life on this planet unfold? Based on a deep understanding of technology, 2062 describes the choices we need to make today to ensure that the
