Visioning Technologies Graham Cairns,2016-12-08 Visioning Technologies brings together a collection of texts from leading theorists to examine how architecture has been and is reframed and restructured by the visual and theoretical frameworks introduced by different technologies of sight understood to include orthographic projection perspective drawing telescopic devices photography film and computer visualization amongst others Each chapter deals with its own area and historical period of expertise organized sequentially to mark out and analyse the historical evolution of how architecture has been transformed by technologically induced shifts in human perception from the 15th century until today This book underlines the way in which architectural forms and design processes have developed historically in conjunction with the systems of sight we manufacture technologically and suggests this continues today Paradoxically it is premised on the argument that these technological systems tend in their initial formulations to obtain ever greater realism in our visualizations of the physical world **The Children's Folklore Review** ,2012 Keio Communication Review ,2010

Communications & Strategies, 2008 [Brandweek](#), 2007 *Understanding Abnormal Child Psychology* Vicky Phares, 2020-08-17 In *Understanding Abnormal Child Psychology* students will learn about both normative and abnormal development throughout children's lives Consistent with previous editions several themes run throughout the book Developmental psychopathology Children's and adolescents' behaviors are on a continuum from very adaptive to very maladaptive with only the very severe ends of the spectrum being conceptualized as disorders Diversity inclusion and understanding Special attention is given to issues of race ethnicity gender family constellation religious orientation primary language socioeconomic status and physical differences to help students see the commonalities and differences of abnormal child behavior within a cross cultural and international context New to the 4th edition Completely revised in both structure and content to reflect the DSM 5 Increase coverage of risk factors related to long term effects of sexual abuse and bullying Increased coverage of diversity to include new diversities that have emerged as important i.e. transgender children New research on suicide and suicide prevention [Taxation of the Digital Economy](#) Gillian Neky, 2020-03-16 Bachelor Thesis from the year 2019 in the subject Law Tax Fiscal Law grade A University of Nairobi School of Law course Dissertation language English abstract This dissertation explores the concept of the digital economy its rapid growth and the tax challenges it has introduced both locally and internationally It examines the general characteristic of a sovereign state and its inherent right to tax source on income generated within its jurisdiction The dissertation attempts to investigate the taxability of the digital economy where business is conducted without the requirement of a physical presence a pre requisite for tax administration How can states and especially Kenya detect permanent establishment for purposes of tax administration for an economy that is heavily reliant on intangible assets and a business model based on data network effects and user generated content It therefore focuses and looks at the scope of Kenya's legislative and policy frameworks and its effectiveness in taxing the digital economy Digital businesses and especially multinational digital enterprises have been able to take advantage of the tax laws and policies that were written for an industrial age and are ill suited for today's digital economy The Action Plan on Base Erosion and Profit Shifting by the Organization for Economic Cooperation and Development set out to answer the fundamental issues of BEPS aggressive tax avoidance planning strategies but it in itself fell short of expectations as it was not able to recommend practical implementable solutions that would close the gaps that exist in the digital economy tax administration The findings revealed that BEPS is not a single problem faced by all states but states face different BEPS problems and evaluate them from their own state centred perspectives Hence the development of many interim measures by different states to tax the digital economy as the international community is still trying to come to a consensus on the possible practical solutions The current Kenyan tax framework on taxation of the digital economy is

obscure as only recent Bills tabled in Parliament try and address the issue in depth In light of the findings of this research it was established that the problem is not so heavy on laws and regulation on taxation of goods sold electronically but rather implementation of the applicable laws where they exist The paper finally recommends possible amendments to the Kenyan legal framework and the proposed amendments are assessed by means of comparison with what has taken place in other jurisdictions
