**A Generation of Excellence** Robert Craig Brown,2007-01-01 The Canadian Institute for Advanced Research originated at the University of Toronto in the early 1980s Since that time it has gone from a small independent centre to an important and revered institution with a significant role in the study of sciences social sciences and humanities in Canada A Generation of Excellence is a detailed history of the CIAR from its humble beginnings to its ascension as one of the most important research organizations in the country Beginning in the summer of 1982 with the CIAR merely a conception in the minds of senior scholars at the University of Toronto Craig Brown takes us through the process of realization detailing the early years of the Institute under the presidency of Dr Fraser Mustard From early struggles to eventual triumphs Brown examines the CIAR s pursuit of an ethos to explore fundamental issues in the social sciences and humanities by funding teams of researchers showing how success was painstakingly achieved The rise of the CIAR is deftly illustrated by pairing its earliest projects with the twentieth anniversary Congress held in 2002 in honour of the Institute and two decades of research A Generation of Excellence tells the story of one of the country s most remarkable institutions

[An Immigrant's Journey into the Cosmos](#) Dr. N Y Misconi,2015-05-19 Astronaut Dr Buzz Aldrin commended the author citing his proposal to transform the Space Shuttle fleet before retiring it into a space tourism fleet which would generate profits for NASA Dr Donald Brownlee Director of NASA s STARDUST Mission that flew to comet Wild 2 said this about the author One of Dr Misconi most significant publications was his 1979 Nature paper on streaming of interstellar grains into the solar system The paper predicted that interstellar dust should stream into the solar system from the direction the then detectable interstellar gas and it also described the interaction of the extrasolar particles with the solar wind and the IP Interplanetary magnetic field The paper was timely and highly prophetic as the stream of interstellar dust was detected just a few years later by instruments on the Ulysses and Galeleo spacecraft Dr Seung Soo Hong former chair of the Astronomy Department at Seoul National University in Seoul South Korea said this about the author I still remember in one of those brain storming sessions he suggested to fire a big gun from a satellite to a nearby asteroid and to observe the scattered light of the Sun and man made source by the dust excavated from the asteroid surface The Space Astronomy Laboratory team couldn t materialize the idea then But to think back this was a brilliant idea with which one can characterize the nature of ligorith particles for a reasonable price
