

CHURN COUNTS: CHI-SQUARE ANALYSIS

This photo represents a group with extensive use of color and describes the type of count and group composition for the "Churn" analysis, represented by the color ChurnCount. The photo shows a dense group of flowers, possibly a lily, but I am not certain (A. Berger and Shaffer (1997) "Yellow" counts are yellow and "Churn" counts are).

Chi-Square Test

• Check the number of people and culture for each line of the analysis and see if there are any errors in the counts or numbers. The error message and numbers should be similar.

• Check the counts for **yellow** and **orange** for each line of the analysis and see if there are any errors in the counts.
