The New Childhood Jordan Shapiro, 2018-12-31 A provocative look at the new digital landscape of childhood and how to navigate it In The New Childhood Jordan Shapiro provides a hopeful counterpoint to the fearful hand wringing that has come to define our narrative around children and technology Drawing on groundbreaking research in economics psychology philosophy and education The New Childhood shows how technology is guiding humanity toward a bright future in which our children will be able to create new better models of global citizenship connection and community

Shapiro offers concrete practical advice on how to parent and educate children effectively in a connected world and provides tools and techniques for using technology to engage with kids and help them learn and grow. He compares this moment in time to other great technological revolutions in humanity's past and presents entertaining micro histories of cultural fixtures: the sandbox, finger painting, the family dinner, and more. But most importantly, *The New Childhood* paints a timely, inspiring, and positive picture of today's children, recognizing that they are poised to create a progressive, diverse, meaningful, and hyper-connected world that today's adults can only barely imagine.

Narratives in Early Childhood Education Susanne Garvis, Niklas Pramling, 2017-05-08. Over the past few decades, a growing body of literature has developed which examines children's perspectives of their own lives, viewing them as social actors and experts in their understanding of the world. Focusing specifically on narratives, this unique and timely book provides an analysis of these new directions in contemporary research approaches to explore the lived experiences of children and teachers in early childhood education, in addition to presenting original research on children's narratives. The book brings together a variety of well-regarded international researchers in the field to highlight the importance of narrative in young children's development from local and global perspectives. While narrative is clearly understood within different countries, this is one of the first texts to build an international understanding, acknowledging the importance of culture and context. It presents up-to-date research on the latest research methods and analysis techniques using a variety of different approaches in order to critically reflect on the future for narrative research and its insights into early childhood education. *Narratives in Early Childhood Education* will be of interest to postgraduate students, academics, and researchers in early childhood education, as well as early childhood professionals, government policy makers, and early childhood organisations and associations.
