## **Celestial Navigation:**

*Celestial Navigation in the GPS Age* John Karl, 2007 Many books on celestial navigation take shortcuts in explaining concepts incorrect diagrams and discussion are often used for the sake of moving the student along quickly This book tells the true story and the whole story It conveys celestial navigation concepts clearly and in the shortest possible time It is tailored for navigation in the GPS age a time of computers calculators and web resources Although it covers all of the traditional methods of working a sight the primary thrust is using the under 10 scientific calculator By using equations that you key into your calculator this book guides you toward a better understanding of the concepts of celestial navigation You will learn novel ways to plot lines of position ways to check your sextant accurately by star sights and how to tell what time it is from a moon sight The many appendices are a treasure of references and explanations of abstract ideas Celestial Navigation is a crucial skill for the offshore navigator to know this book provides the shortest path to that knowledge

**Celestial Navigation** Jeff Toghill, 1986-06-03 To the uninitiated celestial navigation appears to be a somewhat frightening exercise in mathematics In fact the maximum mathematics involved in the new sight reduction systems is the addition of three lines of figures Similarly the apparent complexities of the solar and stellar systems take on a less frightening appearance when related to the lighthouses and similar earthly objects used for coastal navigation Throughout this book the author uses such a comparison between earthly and heavenly objects in explaining the close relationship between coastal and celestial navigation In doing so he reduces a complex subject to a simple and interesting one that can be absorbed by even the most non mathematically minded The book concentrates for much of its length on the plotting of the boat's position by sun planets and stars when out of sight of land It also deals with related navigational routines such as checking the compass by using heavenly objects taking radio time signals and adjusting the sextant for day to day corrections This is celestial navigation in its simplest form presented in a way which even the most amateur navigator can understand and absorb

**Celestial Navigation** Dominique F. Prinet, 2014-07-18 This manual has grown out of all the courses given by Dominique Prinet a certified Instructor Evaluator for Sail Canada who has been teaching celestial navigation since 2000 It has benefitted from the thoughtful contributions of over 100 students The aim of Celestial Navigation is to give a sufficient grounding in the subject to determine position at sea using a sextant for fixes on the sun moon stars and planets Furthermore the material presented will prepare a reader who wishes to pursue a Celestial Navigation Certificate through self study The subject requires some comfort with the basic concepts of navigation but the prospective navigator only needs to know how to add and subtract either times or angles Lucid and well paced Celestial Navigation starts with fundamentals and definitions which ensure that a motivated student need not bring anything more to the table than his or her willingness to master the subject Richly illustrated it includes a chapter with more than forty pages of review exercises covering all topics The cleverness of many of the concepts explained here will bring about great intellectual joy and satisfaction Whether you are a

recreational sailor or an individual pursuing professional certification as a navigator Celestial Navigation will teach you what you need to know [Simplified Celestial Navigation](#) Philip Van Horn Weems,Edwin Albert Link,1940 [The Practical Guide to Celestial Navigation](#) Phil Somerville,2021-10-14 THIS EBOOK EDITION IS DESIGNED TO BE EXPERIENCED ON COLOUR DEVICES The practical guide to celestial navigation know what to do step by step understand why you're doing it and be confident that you can put it into practice when on board Did you know that a person standing on the equator is effectively travelling at 900mph And did you know that you can use this information to work out where you are in the world to an accuracy of about 3 or 4 miles No GPS no computers Just a sextant some tables from an Almanac and the knowledge in this book It's the only back up if the GPS goes down so it's a matter of safety If you want to qualify as a commercial skipper superyacht captain you need to know how to carry out celestial navigation And if you want to pass the RYA Ocean YachtmasterTM exam you need to know it too It's a major stumbling block for many sailors wanting or needing to take their next qualifications and the other books on the market are complex and often assume some prior understanding This book fulfils the need for a clear explanation of celestial navigation illustrated with colour diagrams and including unique checklist sheets to enable you to repeat all those calculations you learned back at home when you're on deck Without overwhelming the reader with a load of theory from the off the author breaks down what you need to do step by step explaining why at every point giving the information context and making it more interesting and memorable He has trained students in this subject for years and here he's able to use his experiences of what works and what are the common pitfalls he even includes a troubleshooting chapter near the end going through errors commonly made and how to spot them The objective is that readers will finish the book not only knowing what to do but really understanding why and being able to make sense of it all again later rather than just getting through an exam and finding themselves at a loss when on deck The author also includes time tested proformas quick reference sheets that sailors can refer to when they come to putting the theory into practice on board avoiding the terrifying cold start that most sailors experience when they suddenly need to put their theoretical knowledge to the test in the real world **Taking the Stars** Peter Ifland,1998 This text focuses on the history of the development of hand held celestial navigation instruments offering descriptions of the tools used It also includes a glossary of technical terms **Celestial Navigation Exercises for Class and Home study** Dominique F. Prinet,2016-01-15 About the Manual Celestial Navigation Exercises for Class and Home Study was designed to facilitate the work of instructors using the free PowerPoint slide presentation available at [CelestialNavigationBook.com](#) This exercise manual available in hard copy and in PDF format for tablets reproduces the questions posed at regular intervals throughout the slide presentation it provides the work forms guiding the calculations and the solutions Students taking a course from an instructor who follows the slide presentation will normally have the associated course book Celestial Navigation using the Sight Reduction Tables Pub No 249 In order to facilitate the download process the free version of the exercise manual available for download from

CelestialNavigationBook.com includes neither the Almanac nor the Sight Reduction Tables required for the calculations because these tables are identical to the ones in the course book. This complete version of the exercise manual with all the required data tables in the appendix will thus be useful mostly to navigators who do not have the course book but wish to practice on their own as well as to students who follow the presentation and have the course book but do not wish to download and print 140 pages of questions and answers. **Celestial Navigation** David Berson, 2018-11-20 Learn and Appreciate What Master Navigators Have Practiced for Centuries in This Hands on Friendly Approach. Celestial navigation in all its forms is nearly as old as mankind. Anyone who can master its intricacies stands at the end of a long line of master navigators that is centuries old an expert among many who would be lost with electronics. David Berson a columnist for Ocean Navigator magazine and an instructor at both the Ocean Navigator School of Seamanship and onboard the training schooner Ocean Star offers here an approach that is refreshing unique and sure to attract a new generation of readers looking to demystify this essential art for sailors. Through his hands on coursework Berson has developed a practical and learnable method of teaching that has appealed to a new generation of students. He will share his proven method here for the first time. While many books on celestial navigation insist this age old art is needed only when electronics fail Berson uses a unique approach that allows boaters to combine both the modern and the traditional. No other books does that. In *Celestial Navigation* as he does in his popular column and classes Berson simplifies the math that so often frightens and deters potential students. Berson takes the same approach with his writing that he does with his classes and columns informal true life anecdotes that entertain as well as educate. To Berson celestial navigation is personal and valuable. Anyone reading this book will catch his contagious enthusiasm.
